

## Data Governance & Quality Platform

**Understand your data and ensure it is reliable enough to support efficient operations and strategic analytics initiatives.**

Reclaim valuable time and resources trying to understand what your data means and trying to resolve data quality issues on-the-fly or verifying data for analysis. Becoming a successful data-driven organisation requires a proactive approach to identifying and resolving data quality issues, and a clear roadmap of initiatives to ensure that data is accessible and meaningful.

Our experienced team of data quality specialists will help you establish your data governance processes and setup a framework to proactively monitor data quality and assign ownership to resolve issues in 4 weeks.

Full steam ahead for Netwealth as it trawls Azure Data Lake for insight and value

*"We obviously have some fairly stringent industry requirements around our data security, data sovereignty. A lot of our compliance requirements involve our data, so we need to be very mindful of that and very careful about where it is and who has access"*

*- Nathan O'Mara, product owner, data and analytics for Netwealth*

### EASE THE COMPLEXITY OF DATA MIGRATION AND REMEDIATION PROJECTS

- Establish data readiness and define clear business requirements to migrate current state to future state processes
- Establish an integration architecture that allows continuous improvement of Data Transformation and Cleansing rules leading up to cutover of systems

### UPHOLD TRUST IN ANALYTICS SYSTEMS

- Establish a knowledge base of rules to detect and track data issues from source systems, verify and reconcile analytic calculations
- Set up a Regression testing hub to continually test the ongoing integrity of your Analytics platform

### ENSURE PROCESS COMPLIANCE AND GOVERNANCE

- Monitor that data capture standards are being adhered to in Operational Systems
- Set standards for accessing, distributing and publishing data

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
