

Enablement program for transformation to Industry 4.0 with Microsoft Azure

ABOUT BIZONE AB:

We are a specialist company focused on building analytics and business intelligence (BI) solutions in the cloud. Our mission is to help our customers become data-driven and maximize the value of their data.

How Industry 4.0 helped our customers:

By enabling the capture of vibration and temperature sensors, combined with machine telemetry, BizOne enabled a global manufacturer to achieve higher quality output, less production waste due to defects and save costs.

WHAT WE OFFER

This consulting program is targeted towards industrial factories that are considering transforming their current business to Industry 4.0 but are unsure of what technologies components they should choose or how much time it might take.

The consulting starts with a 1-hour virtual workshop, where we will guide you through questions regarding your current process/operation and your priorities going forward. Then, based on your answers, we will create high-level design and cost estimation based on Azure IoT and Azure Synapse Analytics

Deliverables in this consulting program are a high-level architectural document and a cost estimate for the enablement project.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
