

BizTech Fusion Migration Services

Migrations to transform your business

Why Migrate?

Relocating on-premises computing services to a cloud-based, Microsoft 365 solution is an enhancement many companies are considering, due to the multitude of benefits enabled by cloud-based architectures. However, understanding why and how to migrate your data efficiently from your current platform to cloud alternatives, while clearly understanding and preparing you for the ramifications of those changes, takes planning, preparation, and no small amount of specialized expertise.

So how **does** one move the entire contents on which your business depends from one location to another, seamlessly, effectively, and with minimal disruption to normal business operations?

The answer is you engage with a reputable firm that has performed many such migrations successfully in the past, is aware of the most common mishaps and pitfalls to avoid, and has the best interests of your business as its core motivation - **BizTech Fusion, your trusted migration partner!**

Features of BizTech Fusion Migration Services

- ✓ **Discovery** – Every engagement begins with a collaborative analysis of your *business* motivations for migrating to ensure the end results support core business objectives
- ✓ **Collaboration** – Key decisions are made jointly with client stakeholders to mitigate missed expectations and promote thorough client awareness of actions and ramifications
- ✓ **Integrity** – “Things happen” in every engagement, the unexpected is nearly unavoidable, but BizTech Fusion is always frank and forthcoming in reporting, then resolving issues
- ✓ **Proficiency** – BizTech Fusion has multiple Gold & Silver Competencies that substantiate our knowledge and abilities in effectively servicing Microsoft technologies
- ✓ **Value** – BizTech Fusion’s rate structure is designed to provide superior value and return on your investment
- ✓ **Flexibility** – Whether your migration objectives are for on-premises to cloud, tenant to tenant, or non-Microsoft to Microsoft conversion, BizTech Fusion has the expertise and experience you need.

Transform the way your business operates

To enable your organization to grow beyond expectations, you must have the benefits of a modern, dynamic, and scalable IT infrastructure. Additionally, you must also build such capability with considered attention to business alignment, growth objectives, and cost/benefit awareness. BizTech Fusion helps you simplify the challenges caused by data explosion, cloud expansion, hybrid datacenter solutions, and other contemporary issues faced by today’s businesses.

- BizTech Fusion has been a global provider of IT infrastructure and business productivity and collaboration solutions since 2006, and has delivered engagements to hundreds of companies of all sizes, across 70 countries.
- We’ve constructed a portfolio of Microsoft-centered professional services that include infrastructure design, implementation, & management; data protection, identity, & access management; and business productivity and collaboration solutions such as Microsoft Teams.
- BizTech Fusion offerings are scalable and fit for any company on the planet in any industry, from small businesses to the largest enterprises, empowering any team to take a good idea and make it an awesome praxis.
