

JOURNEY TO ZERO TRUST: 1-HR BRIEFING

Well
Architected
Framework

JOURNEY TO ZERO TRUST- OVERVIEW

Managing organisational risk is fundamental to securing growth. Understanding zero trust concepts to provide the appropriate guardrails for modern cloud services

BJSS offers a free 1-Hr overview to:

- Delve into the Zero Trust Rapid Modernisation Plan (RAMP)
- Present examples of zero-trust delivery gathered from BJSS' vast experience across many industries and clients
- Discuss the emerging threat landscape
- Understand how automation enables assurance
- Surface opportunities to shift-left in your organisation
- Understand your business challenges

A PROVEN APPROACH

1

We follow the latest best practice recommendations from Microsoft, and share our proven experience of implementation across multiple industries

UNDERSTAND YOUR BUSINESS

2

We will work together to understand your business objectives and most pressing security requirements

IDENTIFY THE PRIORITY AREAS OF FOCUS

3

We will advise you as to how best to approach the implementation of zero trust principles, to ensure minimal business impact

PRINCIPLES OF ZERO TRUST

- **Verify explicitly:** Always authenticate and authorize based on all available data points, including user identity, location, device health, service or workload, data classification, and anomalies.
- **Use least-privileged access:** Limit user access with just-in-time and just-enough-access (JIT/ JEA), risk-based adaptive policies, and data protection to help secure both data and productivity.
- **Assume breach:** Minimize blast radius and segment access. Verify end-to-end encryption and use analytics to get visibility, drive threat detection, and improve defences.
