

STUDIO IN A BOX

Azure-Powered Solutions for Seamless Studio Performance

By combining our Azure expertise with our cloud-native **accelerators**, that feature reusable vending capabilities, Studio-in-a-Box is a service that liberates you to spend your time doing what you do best: **Creating and delivering the next generation of gaming experiences.**

Our accelerators deliver secure, compliance-based services founded on **Microsoft Cloud Adoption Framework** principles, with reusable components providing the basis to evolve your delivery platform and studio.

Meet player demands with secure and actionable data insights

Build robust, accessible data platforms, integrated and secured with industry-leading Microsoft technology.

With Infrastructure as Code, ensure that your IP is safe, without hindering creativity.

Identify issues and risks across your studio via customisable dashboards.

Elevate your focus with end-to-end expert support

Power up your creation and future-proof your studio with BJSS' Managed Services, providing the flexibility to scale the service with end-to-end support you can trust.

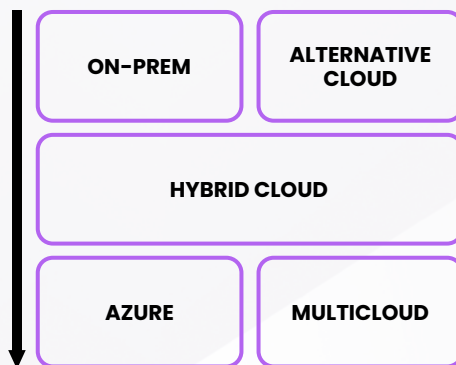

Break free from legacy constraints and modernise your tech

Through the self-serve provisioning of infrastructure; virtual machines and developer tools are accessible anywhere, any time.

ALL IN A COST-EFFECTIVE PACKAGE

No matter the stage of your cloud journey, Studio-in-a-Box hosted on Microsoft Azure can support your transformation

Ideal for customers who are:

Fully on-premise, with legacy constraints.

Running hybrid across on-prem and cloud.

With a cloud provider like AWS or Google Cloud and want to migrate to Azure or leverage cloud.

In Azure but have not taken full advantage.
