

DISCOVERY CONSULTATION:

ACCELERATE DEVELOPER VELOCITY

Free of charge Discovery Consultation (3H). Our team quickly evaluates your current strategy and approach to DevSecOps and IaC, and deliver a Developer Velocity recommendations report and a clear roadmap with next steps.

ABOUT THIS SERVICE.

BlakYaks Discovery Consultation is designed for clients aiming to mature their DevSecOps and Infrastructure as Code (IaC) strategy.

Our team dig into the detail of your App development life-cycle and compare this against our recommended methodology helping to navigate common challenges / blockers and provide you with a clear plan of action.

WHAT WE OFFER.

Get access to a specialist consultant-led advisory service. We will facilitate a “deep dive” into your DevSecOps implementation and IaC strategy. We'll begin by defining your business objectives and evaluating your existing Azure environment, DevOps team approach, and the technologies you use.

We will assess your level of maturity and help you to shape a future development roadmap.

All findings will be presented and documented in a Developer Velocity recommendations report.

During the consultation, we will ask a series of crucial but essential questions about your organisation and its infrastructure and processes. This input helps us evaluate at what maturity stage your Azure platform is and how ready your organisation is for DevSecOps adoption.

WHAT YOU GET.

Platform evaluation

Automation approaches

Developer Velocity report

Priorities and roadmap

Dev-focused recommendations

Guidance and next steps

CHALLENGES.

1. DevSecOps adoption strategies and security integration
2. Foster a collaboration culture between dev, sec, and ops teams
3. Legacy system automation approaches
4. Cloud native skills gap

BENEFITS.

- ✔ Define business goals, challenges and future plans
- ✔ Identify areas where you can optimise costs
- ✔ Enable collaboration and foster innovation
- ✔ Enhance security and compliance posture
- ✔ Adopt industry best-practices
- ✔ Be ready for modern application architectures

ABOUT US.

BlakYaks is a UK leading cloud native consulting, engineering, and managed service business that deploys and operates Microsoft Azure platforms and solutions entirely with code.

With deep Azure platform expertise and proficiency in GitOps, DevSecOps, Containerisation and IaC, BlakYaks offers end-to-end cloud native solutions, tailored to meet each customer's specific needs, with the goal of optimising costs, streamlining operations, and accelerating the journey to cloud native.
