

DELIVER A HIGHER RETURN ON INFORMATIONⁿ - (ROI)ⁿ

Organizations consuming data driven Actionable Insights as a catalyst for marketplace differentiation significantly outperform their market competitors. Cloud accelerates journey towards Intelligent Enterprises by providing new market orientation, applications and automation.

A Higher Return On Information - (ROI)ⁿ Delivers

- Enriched processes with Data Driven Actionable Insights
- Empowered people with rich, in context & timely insights
- Embedded AI and ML within business workflows to operate and adapt to market

IP based No-code data to Datalake ML/ Analytics / Apps

- Strategy
- Technology Platforms
- AI Embedded in Processes
- Custom Reports and Analytics
- Process changes

Transactional Analytics

Enriched processes with Data Driven Actionable Insights

- Aligned to KPI's & Specific for your business
- Uniquely useful & business-user relevant insights

Higher Return On Information with 50% faster insights @ 33% lower cost

Cognitive Capabilities

Embedded AI and ML within business workflows to operate and adapt to market

- Predictive, relevant in time and market conditions
- Uniquely Useful and Clearly understandable

Unleash ML & cloud analytics, on XLS / PowerBI UI / Webservices with 0 new in-house skills / infra

Contextual Streams

Empowered people with rich, in context & timely insights

- Contextual and Relevant in time / market conditions
- No-code / easy to consume data access based on standards for adaptable processes

Proven, IP driven accelerated delivery at a fixed package price

GEP delivers exceptional savings to our enterprise customers with SMART procurement, reliably integrated with their SAP using ODDI

- Abhishek P, Vice President, GEP

Solution deployed on Microsoft Azure: On-demand, No-code, Agile

- Faster Actionable Insights
- Cloud accelerates journey towards Intelligent Enterprises by providing new market orientation, applications and automation
- Reduced risk to project timelines, integration cost and complexity

- Reduce Total Cost Of Ownership
- Refocus cloud initiatives for Business Capability Enhancement, beyond removing costs
- No-code, no-infra based dynamic SAP data access on Pay per use, On-demand basis

- Modern, efficient Infrastructure
- SAP data provisioned for Azure ADLS data lake cloud storage
- Simple API, consumable by most modern applications, business users & developers

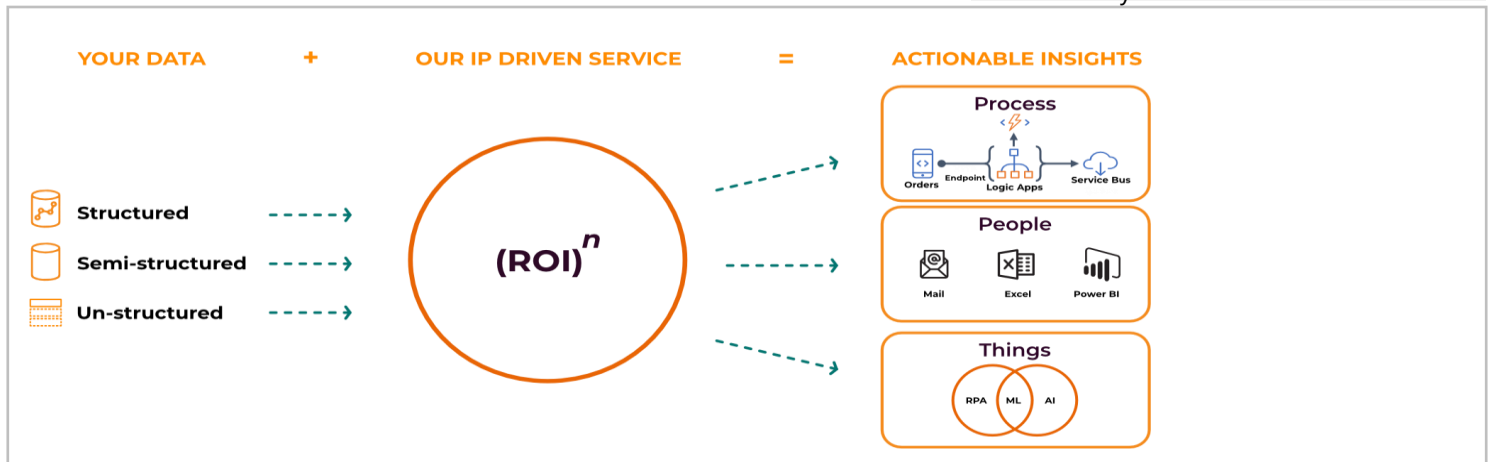

Provision what, when and where with SAP Data

Our promise to you

Business results focused on providing insights, analytics quality data and predictive AI / ML

An offer to get you started

- Business user-driven transformation of the data using No-code / low code
- Rapid deployment & responsive support
- ODDI based SAP data extractor
- 33% accelerated implementation cycles, with rapid PoC and agile delivery

A harmonized approach for Your and SAP Data

- Standard OData API based on REST for On-demand access to any SAP table / view & its underlying structure, ABAP report.
- Full load or delta load, real time access via API for consumer apps like MS Excel, PowerBI etc.
- Compliments SAP CPI DS for HANA / other modes of accesses.
- Simple, single stack (SAP only) based access using customers existing landscape (SAP ERP / BW / CRM / APO etc.).

Why Blazeclan?

- IP / tools driven proven approach tailored for SAP landscapes looking to use cloud analytics.
- Blend of SAP IP and SME's, with premier cloud delivery capabilities, IP based Cloudlytics, 450+ resources globally.
- Accelerated time to delivery in few weeks, at a fixed package price.
