# Automate Everything

FROM IDEA TO REALITY IN THE BLINK OF AI

Experience unmatched speed and efficiency in automating your security processes.

On data leak alert in **PAN Firewall**
Suspend the user account using **Okta**

On alert in **Wiz** enrich the alert using **Datadog** and notify the devops team using **Slack**

Find all users in **Active Directory** that have not logged in for at least 30 days

✨ Generating...

AUTOMATION BY THE NUMBERS

100x Faster than SOAR

Blink combines a low-code visual interface with a natural language prompt, and leverages generative AI to convert simple prompts into workflows. You can expect the same level of capabilities as competing low and no-code automation platforms, but with a much faster "time-to-automate" that is now accessible to all security practitioners across all teams, regardless of skill set.

30,000+

+ API actions

Blink flexes with you, no matter what your existing stack is. With just a few clicks, you can add new connections, build steps, or automate a full security process.

936%

ROI

With Blink, a typical enterprise can achieve an estimated 936% ROI with time savings and reduction in breach damage control costs.

Security Automation at the Speed and Scale of AI

With our AI copilot embedded across components in our platform, Blink makes building, collaborating, and scaling workflows for all things security & beyond effortless.
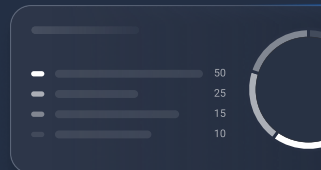

Smart Case Management

Blink's AI-powered case management serves as a command center where security teams can quickly deduplicate, enrich and triage incidents.
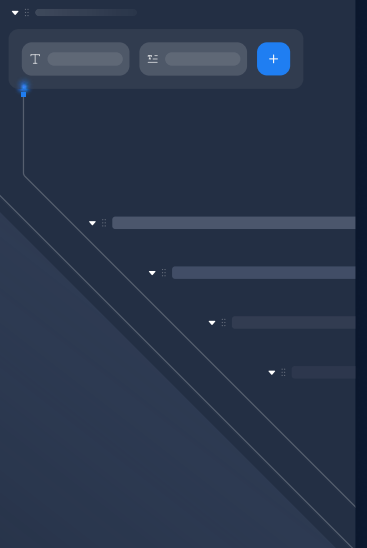

Self-Service Apps & Web Forms

Substitute incoming work tickets with self-service workflows. Enable colleagues to specify inputs and let your automation handle the rest.

No-Code Workflow Editor

Create your workflows with custom scripts, personal templated actions, or native drag-and-drop actions. With our AI Copilot embedded in the editor, you can continue to refine workflows at the step-level to build the exact version you need with precise actions.

Prompt-Based AI Copilot

Simply type a natural language prompt and watch your security workflow be created in moments. With our embedded AI Copilot seamlessly integrated into the Blink platform, users can switch effortlessly between designing, testing, and running workflows within a single platform.
