

Microsoft Business Central Integration (BLP Package)

Business Central & Navision Integration

Integration Overview

Downloads:

We can build the package for your specific BC version upon request.

Installation:

Installation procedure before Package is available on the Microsoft Marketplace:

1. Download package file (.app)
2. Buy the following Microsoft Licences from your Microsoft Partner

Type	Count	IDs	Permissions
TableData	2	80000 - 80001	RIMDX
Codeunit	9	80000 - 80008	RIMDX
Page	40	80000 - 80039	RIMDX
Table	3	80000 - 80001,80005	RIMDX

3. Import the BLP Package into your BC
4. Setup and expose the following Web Services

Type	Object ID	Object Name	Service Name
Codeunit	80000	blpPurchasesMngt	blpPurchasesMngt
Codeunit	80004	blpAttachmentMngt	blpAttachmentMngt
Codeunit	80008	blpAppModule	blpAppModule

5. Create a new user BLP_USER and assign the Permission Set BLPPERMISSIONS.
6. Send the credentials of this user to BLP. (ClientID & ClientSecret)

Custom field mapping setup (Optional)

Setup a custom fields mapping in the BC Menu BLP - Dynamic Integration Mappings.

Example: To setup a mapping of a custom field for the Item table, create a new entry for Item and specify the mapping as follows:

BLP Field Name	Field No.	Field Name
blpCustomField	YOUR_FIELD_ID	YOUR_FIELD_NAME

Functional description of the package

The package exposes 3 codeunits blpPurchasesMngt, blpAttachmentMngt and blpAppModule.

Codeunit	Function	Description
