Ensure security and validity

Paperless signature approvals

Increase efficiency

Improve compliance

DocuSign®

netdocuments®

Business Benefits:

Increase efficiency

Integrate signing processes directly into NetDocuments, reducing task time by completely eliminating the "print-sign-scan-file" process.

Improve governance and compliance

Enforce firmwide DMS integration policy, reducing human error and providing a comprehensive audit trail of the entire esigning process.

Ensure security and validity

Any recipient of a document digitally signed with the DocuSign Connector can easily verify the signature.

Paperless signature approvals

Skip the process of having to print documents only to sign and scan them back in. Go paperless without drastic changes to existing processes.

DocuSign Connector for NetDocuments ROI points:

- Support cloud and on premises implementations.

- An intuitive right click action to initiate the DocuSign signing process within NetDocuments, shortening the signing process to seconds.

- Signed documents automatically saved back into NetDocuments as a new version or new document, reducing user workload by eliminating the manual "print-sign-scan-file" process, and automatically re-filing documents with their originals.

- Flexible and rich configuration options to match your organisation's workflow, simplifying the esigning and DMS management process.

- Complete audit trail and traceability, meeting or exceeding your governance and compliance requirements.
