Azure Accelerate

A Cloud Adoption and Planning Program by Blue Chip Consulting Group

The benefits of cloud computing are significant, but the complexity of planning, building, and managing a cloud-based environment can be difficult. That's why Blue Chip developed Azure Accelerate, a cloud adoption and planning program.

Azure Accelerate brings together best practices, processes, and tools to operationalize cloud adoption. Delivered by analysts and architects with decades of project experience, Azure Accelerate give you insight into server inventory, operating costs, and more. Not only does the program allow you to determine the ROI associated with moving workloads into the cloud, but give you the information and roadmap to actually do it.

Azure Accelerate consists of two assessment types, each designed to accelerate cloud adoption from different points in the cloud lifecycle.

Azure Accelerate Deliverables	Foundation Assessment	Detailed Assessment
Environment Summary	✓	✓
Cloud-Ready Workloads	✓	✓
Environment Recommendations	✓	✓
Migration Dependencies		✓
On-Premises As-Is Costs	✓	✓
Optimized Costs	✓	✓
Hybrid Usage Benefit Costs	✓	✓
Reserved Instances Costs	✓	✓
License Entitlements		✓
Potential Savings		✓
On-Premises Architecture		✓
SaaS Architecture		✓
PaaS Architecture		✓
IaaS Architecture		✓
Inventory Information	✓	✓
Azure Migration Metadata		✓
Server and Application Complexity	✓	✓
