

# EV247™

## Cloud archiving without compromise

Allowing organizations to move their on-premises Enterprise Vault™ to Azure™, fully managed by our award winning Managed Services

**“The cloud offered the flexible archiving solution that liberated our internal IT resources from both the challenges and costs of managing our systems. Bluesource’s EV247™ solution was the best option for us, as it combined their knowledge of Microsoft Azure™, Veritas Enterprise Vault™ and their expert managed services.”**

**David Southern,  
Director of ICT, WWF**

bluesource

As a Bluesource EV247™ client, IT teams receive a dramatically improved archiving service that is protected by a financially backed SLA. In our SaaS model, the application is fully managed by trained professionals freeing personnel to focus on critical projects.

## Guaranteed availability

EV247™ guarantees the availability of your data with a 99.9% uptime SLA

Performance guarantee

Response time guarantee

## Manage your costs

Thanks to the economics of the cloud, businesses benefit from a lower total cost of ownership without sacrificing any features or functionality

Upgrades and patching are free of charge

Have peace of mind with predictable spend

## Access from anywhere

Direct access to archived email from mobile devices. Combined with Virtual Vault, users have access to view archived data offline

Mirror your data center to another

## Time savings

**300+ hours**

EV247™ can save you hundreds of hours a year, which organizations can put towards activities to drive their business forward
