Microsoft Platform Management

In your Microsoft environment, next never stops. Your next merger or acquisition. Your next Office 365 migration. Your next compliance audit. Your next Active Directory security threat. Quest is the only company with end-to-end products for your next migration, management and security challenges across any Microsoft platform, including Active Directory and Office 365 workloads such as Teams, SharePoint, OneDrive for Business and Exchange.

Quest on Demand

Simplified SaaS-based cloud backup, recovery and policy management

On Demand Migration

Quickly and safely migrate directories, mailboxes and shared data from one Office 365 tenant to another with instant coexistence.

On Demand Audit

On Demand Audit tracks all configuration, user and administrator changes made across AD, Azure AD, Exchange Online, SharePoint Online, OneDrive for Business and Teams.

On Demand Recovery

Quickly, securely back up and recover Azure AD and Teams data to eliminate downtime as well as negative impact to end users.

On Demand Group Management

Get full control of Azure AD, Office 365 and hybrid AD groups across your organization — all in a single application — to mitigate security and compliance risks caused by group sprawl and access creep.

On Demand License Management

Gain complete visibility into Microsoft Office 365 and Azure AD licenses and get the reporting capabilities you need to more easily achieve optimal license utilization, display and analyze trends and estimate license costs and loss.

Active Roles

Active Roles is a unified AD-management tool that secures hybrid environments and much more.

Quadrotech Nova

Enhance delegation and policy control for Office 365 with pre-defined roles for specific users
