- II. The three Divisions– Our full-service-concept
 - Division I: Academy
 - Division II: Architecture
 - Division III: Operating
- III. Azure Stack Jumpstart – Your comprehensive pre-deployment-workshop

THE OBJECTIVE

Our motivation: Your IT success

THE OBJECTIVE

Our motivation: Your IT success

The goal of the Azure Stack Alliance is to provide companies with a holistic approach from the first moment of their journey to Azure Stack Hybrid Cloud Integration. From the comprehensive employee training over the individual system architecture to the implementation and the safe operation of the active system, we meet all the requirements of our customers in the competence network. Transform your IT with us and benefit from our unique full-service concept.

THE THREE DIVISIONS

Our full-service-concept

THE THREE DIVISIONS

Our full-service-concept

Division I:
Academy 

Our academy Division deals with the training and education of your employees around the topic of Azure Stack for an optimal basis of competence during operation.

Division II:
Architecture 

The architecture section covers the complete integration of Azure Stack in your company from inventory, system concept to technical implementation.

Division III:
Operating 

With our operating division, we provide you with all-round carefree service and take care of all the operating-related issues of your active Azure Stack system.

DIVISION I: ACADEMY

Azure Stack expertise
in your company

DIVISION I: ACADEMY

Azure Stack expertise in your company

Our Azure Stack trainers provide targeted, in-depth training for your IT staff for an optimal knowledge base in your organization. All areas of the Azure Stack implementation are considered and covered.

7

AZURE STACK JUMPSTART

Your comprehensive
pre-deployment-workshop

AZURE STACK JUMPSTART

Your comprehensive pre-deployment-workshop

In the on-site "Azure Stack Jumpstart" one-day-workshop, we will work with you to discuss all the issues required to successfully integrate Azure Stack into your data center. The workshop offer also contains 3 follow-up calls for an optimal preparation.

The daily workshop covers the following areas / topics:

- ✓ Network / IP-Ranges
- ✓ Naming: FQDN / DNS
- ✓ Certificates
- ✓ Firewalling / Connection
- ✓ Sizing
- ✓ Azure AD (Connected / Disconnected)
- ✓ Next Steps
- ✓ Monitoring
- ✓ Services (IaaS, PaaS)
- ✓ Backup and Recovery
