

# EFFECTIVE DEBT COLLECTION

Get immediate reactions from your customers at a lower cost

Swap routine outbound calls for our AI voice assistant, enabling you to process 1000 calls in 15 minutes, without emotional investment. Your customers get a reminder, and you get a higher percentage of immediate reactions.

**80-90%**

OF ANSWERED PHONE  
CALLS

**2 DAYS**

ASSISTANT

**75-78 %**

SUCCESSFUL CUSTOMER  
REACTIONS

## DISPOSE OF THE LEAST FAVORITE PART OF AN OPERATOR'S JOB

No notifications and reminders of reminders. Voice assistant gets to the point immediately and directly.

It calls the customer and after a short introduction, lays out their options. It finds out relevant data and answers commonly asked questions.

After the call, it sums up the call in a text message or an e-mail and flag customers in the database, according to call results.

## VOICE ASSISTANT DEALS ALSO WITH

**A NON-EXISTENT NUMBER:** If the customer states an invalid number, voice assistant recognizes it before making the call.

**POSTPONED CALLS:** Many customers don't answer the first call or ask for a later call. Voice assistant postpones the call and calls again at the set time.

**INCOMING CALLS:** If the customer returns the call, voice assistant answers it, introduces itself, thanks the customer for returning the call and continues to assist the customer. All that 24/7.
