

Microsoft 365 Copilot

Readiness Assessment

Microsoft 365 Copilot is an AI-powered productivity tool that can revolutionise your workplace, improve productivity across the suite, and allow your team to focus on generating value for your organisation.

However, to get the most out of your investment, it's essential to understand the prerequisites and be adequately prepared. That's where the boxxe Microsoft 365 Copilot Readiness Assessment comes in. Our assessment helps you prepare for deployment so that you're ready to leverage its full potential.

What we offer

Our assessment starts with a questionnaire and a review of your environment. The key to getting the most out of Microsoft Copilot is ensuring you are prepared for it. In the assessment, we will:

- Give you an overview of Microsoft Copilot
- Identify stakeholders
- Discover challenges, goals, and opportunities for Copilot
- Discover your data locations and data types
- Review the assessment and deliver the guidance report and discuss next steps

Who is this for?

CIOs - COOs - IT Directors - EUC team members - IT Managers

Learn how Copilot can benefit your organisation

Understand areas to address to utilise Copilot

Discover your next steps with your new Copilot
