The consultancy bundle

This consulting bundle will help you shift your workload to the cloud within your budget by analyzing your current environment and deciding on the most efficient and cost-effective approach for your organization with insights, analysis & recommendations.

The bundle

This consulting bundle will help you shift your workload to the cloud within your budget by analyzing your current environment and deciding on the most efficient and cost-effective approach for your organization with insights, analysis & recommendations.

Consultancy Phases

The Cloud Migration Assessment - Base Plan will include the below three phases

1

ASSESS

A team of Azure experts will assess your environment in order to get a complete view of your current workloads

2

PLAN

Based on the output of the assessment, We will provide you with an analysis and mapping of your server's environment.

We will help you to optimize your current server workloads and applications and will provide benefits to moving your workloads to virtualization or the Cloud.

3

DECIDE

Based on your priority we will provide a roadmap for your Azure move and the monthly cost
