

Extend Your Datacenter into Azure

3-Day Workshop

About B&R Business Solutions

B&R Business Solutions provides innovative solutions and strategies that meet even the most unique business and technology challenges.

B&R specializes in the cloud, and we have years of experience supporting customers on their journey.

What we offer

B&R Business Solutions will work closely with your team to virtually extend your existing on-premises data center into the cloud using robust, secure connectivity options to solve challenges such as:

- **Data center operating at physical capacity:** Extending your data center to Microsoft Azure allows for limitless expansion without the need to procure new physical hardware or perform costly renovations to your existing server environment.
- **Dated hardware or reduced on-premises capabilities holding the organization back from achieving objectives:** Embracing a cloud-extension strategy enables access to the latest and greatest technologies and platforms with greater agility than retrofitting your on-premises data centers for new workloads.

What our customers are saying

“They were instrumental in rearchitecting on-premise sites to our new global cloud environment, even sharing pointers with our site administrators. Quality is never a concern, and they are one of the few external teams that does not require constant oversight..”

– Josh Hill, Integration Manager, Kering Group

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
