

# Microsoft Teams Application Development

## Built to Solve Any Problem!

Microsoft Teams is a portal into your business

Microsoft Teams is an ideal solution for business collaboration, including chat, audio and video conferencing and even telephony.

However, it is also a platform upon which you can build applications that support your business processes.

B & R Business Solutions can help you to leverage the strength and flexibility of Microsoft Teams, combined with infinitely scalable Azure services to create a solution custom suited to YOUR business requirements.

### Why use Microsoft Teams?

- **Teams apps streamline work.** Applications can run right inside the Microsoft Teams client, allowing users to have immediate access to the information.
- **Teams apps bring teamwork capabilities to business applications.** The collaboration capabilities native to Microsoft Teams facilitates information sharing and can reduce the amount of email needed to coordinate the use of business applications.
- **Teams apps can lower cost and time to value.** Microsoft Teams apps can be built quickly using low code techniques, leveraging native Azure security features, and natively supporting application use on iOS and Android mobile devices.
- **Teams apps are discoverable.** Microsoft Teams applications can be deployed quickly across your organization and updated centrally using the Teams Administration toolset in Microsoft 365.
