

Delivering Modern, Powerful Desktops Securely from the Azure Cloud 2-Hour Workshop

About B&R Business Solutions

B&R Business Solutions provides innovative solutions and strategies that meet even the most unique business and technology challenges. For any size or type of organization, B&R utilizes the skills and expertise of our team members to find the right solution – the first time – and deliver in a manner that exceeds all expectations.

Do You Need Azure Virtual Desktop or Windows 365 PC's

Let us help answer that for you!

Azure Infrastructure as a Service (IaaS) allows organizations to quickly create secure and scalable infrastructure—while reducing the time and money spent to plan, procure, manage and support those assets.

With Azure Virtual Desktops delivered by B & R Business Solutions, your organization can have the peace of mind that comes from providing end users with a high-quality, modern desktop, complete with your organization's suite of applications, and secured in the Azure cloud.

No more desktop refresh projects to worry about; no more broken laptop screens at the help desk; no more scrambling to find a loaner laptop - provision users with an Azure Virtual Desktop image and they're ready to go! We make it easy!

What our customers say:

They were instrumental in rearchitecting on-premise sites to our new global cloud environment, even sharing pointers with our site administrators. Quality is never a concern, and they are one of the few external teams that does not require constant oversight.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
