
Are you ready to Transform your Data Operations?

Brandon Systems is excited to offer a comprehensive 4-week Microsoft Fabric Proof of Value (PoV) engagement designed specifically for healthcare organizations like yours.

What You Can Expect

- **Healthcare-Specific Training:** Educating your team on how Microsoft Fabric enhances healthcare workflows, such as patient data management, predictive analytics, and compliance tracking.
- **Comprehensive Analysis:** An in-depth assessment of your current healthcare data environment to identify opportunities for optimization using Microsoft Fabric.
- **Tailored Platform Design:** Development of a custom architecture to address your specific healthcare use cases, from population health to revenue cycle management.
- **Pilot and Proof of Concept:** A working prototype using your clinical or operational data to demonstrate Fabric's ability to deliver measurable value.
- **Seamless Integration Strategy:** A roadmap to deploy Microsoft Fabric with minimal disruption to care delivery and operational processes.
- **Scalable Framework:** A strategy to support future data growth, enabling advanced analytics such as predictive models and AI-driven insights.

Engagement Timeline:

- **Pre-Engagement Analysis:** Assess healthcare systems, define goals, and identify opportunities for Fabric implementation.
- **Week 1 - Planning & Strategy:** Kick off with platform introduction, dataset selection, and implementation planning tailored to healthcare workflows.
- **Weeks 2 & 3 - Pilot Execution:** Build and configure the environment, integrate key healthcare datasets, and develop dashboards for actionable insights.
- **Week 4 - Optimization & Handover:** Refine the implementation, deliver training, and provide documentation and a roadmap for future growth.

Partner with Brandon Systems to unlock the full potential of Microsoft Fabric for your healthcare organization. Contact us today to get started!
