

**Are you ready to transform your organization's data capabilities?**

Join us for an exclusive 5-Day Proof of Value Workshop led by Brandon Systems, where you'll gain an in-depth and hands-on overview of Microsoft Fabric.

#### **What to Expect?**

- **Expert-Led Workshop:** Our highly qualified team of Azure and Fabric experts will guide you through every step.
- **Proof of Value Implementation:** Experience Microsoft Fabric's capabilities firsthand, including a Power BI report, a data model, related data pipelines, and more.
- **Deep Dive into Microsoft Fabric:** Get practical experience and tailored insights into how Fabric can enhance your organization's operations.
- **Tech Talk:** Learn about KQL, Data Science, and Real-Time Analytics components in Fabric.

#### **Workshop Agenda:**

- **Day 1:** Kick-off Meeting – Review your current data engineering and BI architecture, understand success criteria, and discuss Proof of Value outcomes.
- **Day 2:** Fabric Workspace Setup – Create a One Lakehouse and configure data sources.
- **Day 3:** Data Model Setup – Ingest data into the lakehouse using Data Factory and transform data into delta tables using Synapse Notebooks.
- **Day 4:** Dashboards and Reports Setup – Create dashboards and reports in Power BI, showcasing Power BI Copilot capabilities within Fabric.
- **Day 5:** Demo and Final Walkthrough – Conduct a demo, provide a final walkthrough, and deliver a comprehensive tech talk on Fabric Administration, Copilot, Security, and Governance.

This workshop ensures that you gain a thorough understanding of Microsoft Fabric and its practical applications, enabling you to make informed decisions and drive business value.
