Brandon Systems: FabricExpress™ for Healthcare

4-Week Proof of Value

What is FabricExpress™?

FabricExpress™ for Healthcare is a fast-track, purpose-built solution designed specifically for the complex healthcare data landscape. Built entirely on Microsoft Fabric, it includes:

- Ready-to-use dashboards

- Prebuilt data connectors

- Healthcare-specific semantic models and measures

- And more

By combining healthcare expertise with preconfigured assets, FabricExpress™ reduces risk, lowers cost, and accelerates time to value—helping your team deliver trusted, actionable insights from day one.

Why Healthcare Organizations Choose Brandon Systems

- Healthcare Expertise: With decades of experience supporting hospitals, health systems, and provider organizations, we understand the nuances of clinical, operational, and financial data.

- FabricExpress™ for Healthcare: Included in every engagement, FabricExpress™ accelerates Fabric adoption with prebuilt dashboards, semantic models, healthcare measures, and connectors—based on the PoV scope and tailored for healthcare.

- Compliance-Driven Approach: Our solutions are built to meet HIPAA and healthcare data privacy requirements from the ground up.

- Outcome-Focused: We design systems that support better decision-making, improve patient outcomes, and drive operational and financial performance.

What to Expect:

- FabricExpress™ Built-In: Accelerates value delivery with reusable assets and proven methods

- Healthcare-Specific Training: Guides your team on how Microsoft Fabric supports patient data management, predictive analytics, and compliance

- Comprehensive Analysis: A thorough review of your current healthcare data environment to identify optimization opportunities

- Custom Platform Design: Tailored architecture aligned to the use cases delivered—such as financial performance, clinical outcomes, or revenue cycle improvement

- Pilot & Proof of Concept: A working prototype using your real-world data to demonstrate measurable value

- Integration Strategy: A roadmap for low-disruption deployment into your healthcare workflows

4-Week Engagement Timeline

- Pre-Engagement Analysis: Assess current systems, define success criteria, and identify target use cases

- Week 1 – Planning & Strategy: Kick-off, dataset selection, and implementation planning aligned to healthcare workflows

- Weeks 2–3 – Pilot Execution: Configure Microsoft Fabric, ingest healthcare datasets, and build dashboards

- Week 4 – Optimization & Handover: Final refinements, team training, documentation delivery, and roadmap presentation

Brandon Systems is a trusted Microsoft partner with a proven track record in healthcare data transformation. Let us help you get the most out of Microsoft Fabric—faster, safer, and with measurable results.
