

# AI Center of Excellence

At Bravent, we understand that the true value of AI is realized when there is a strong alignment between business strategy and technology capabilities to identify and prioritize high impact use cases.

## What is it?

An Artificial Intelligence Center of Excellence (AI CoE) is a dedicated team within an organization focused on driving AI initiatives and innovation. It centralizes AI expertise, resources, and best practices to enhance efficiency, decision-making, and competitive advantage. Implementing an AI CoE can help a company stay ahead in technology, streamline operations, and foster a culture of continuous improvement and innovation.

**2 out of 3** decision makers expect to increase their investment in AI in the next 3 years

\*McKinsey

**4 out of 5** enterprises will use AI applications in 2026

\*Gartner

### About Bravent

As a global Microsoft IT Partner, we provide customized solutions in AI, Data, Business Applications, App Development, Modern Work, Infrastructure, and Security. With a strong international presence, we innovate across diverse industries, supporting clients in Americas, Europe and Middle East.

# AI Center of Excellence

## What will the adoption process be like?

To implement and develop AI solutions in an agile way, a technical and business analysis must be carried out, a common architecture for the development and deployment of solutions must be consolidated, and finally, time & materials must be raised to solve issues related to the developments originating from the CoE.

# AI Center of Excellence

Through training, consulting and a staggered implementation, you can take advantage of an AI CoE by accelerating projects, improving your business development and applying solutions that will allow you to achieve new goals.

## What BENEFITS will you obtain?

- **Lead the future** with artificial intelligence.
- Ensure the success of your projects with new standards of **excellence**.
- Drive technological **innovation** forward through constant evolution.
- Empower your team with new age **knowledge and skills**.
- **Unlock** your company's potential and maximize the AI impact.
- Align technology with your **strategic goals** for sustainable growth.

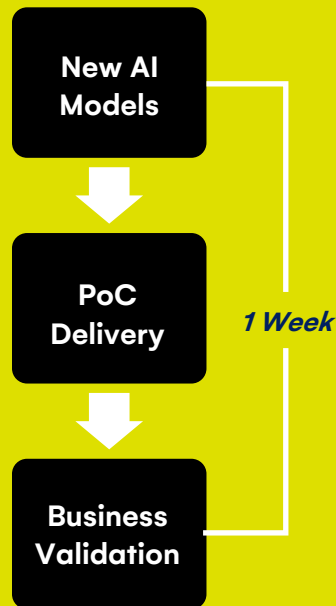

## Idea Accelerator

A fundamental part of the CoE is the Idea Accelerator.

Through an agile and iterative approach, it drastically reduces the risk associated with implementing new technologies and ensures that the solutions developed are appropriate and effective.

### This accelerator allows to:

- Encourage a culture of experimentation and continuous learning.
- Quickly explore new ideas.
- Validate their technical and commercial viability.
- Bring innovative solutions to market in record time.
- Keep any solution at the forefront of AI innovation.

## Some AI CoE Applications

- AUTOMATION of business processes.
- Improved customer experience through CHATBOTS and virtual assistants.
- Supply chain OPTIMIZATION.
- Predictive ANALYTICS and informed decision making.
- Development of INNOVATIVE products and services.
