

Stay ahead of threats with
maximum visibility and control

Designed for

Google Workspace  Office 365

The dashboard interface is divided into several sections:

- Left Sidebar:** Contains navigation links for Overview, Alerts, Users, Emails, Reports, Collections, and an ADMIN section with User Management, Organizations, and Settings.
- PREPAREDNESS:** A large green circle displays a score of 100 OVERALL.
- SIGNALS:** A list of three items: Graph API, Exchange API, and PowerShell, each with a green checkmark icon.
- PROTECTIVE:** A list of four items: Audit logs enabled, DKIM, DMARC, and SPF, each with a green checkmark icon.
- ORGANIZATION DATA:** A table with four rows: Days Logged (104), Emails (375), Users (92), and Logs (5.6K).
- Prioritized Alerts & Risks:** A section with two main categories:
 - ALERTS:** Shows 24 high severity alerts (4 days ago) and 10 medium severity alerts (6 days ago). A callout box for the high severity alerts reads: "Threat Intelligence: A Phish threat was found by ThreatIntel." with a "View all 24 alerts" link.
 - USER RISKS:** Shows two user profiles. The first has three risks: SMTP Enabled, IMAP Enabled, and POP Enabled. The second has one risk: MFA Disabled.

One-click install

Effortlessly integrate BreachQuest into your email system with our one-click installation process. Gain immediate, enhanced visibility and control over your organization's email environment.

Configure Your Service Provider ✕

You need to configure your email service provider to allow us to analyze your information. We support both Microsoft 365 and Google Workspace.

Microsoft 365

Google Workspace

Choose to automatically link your Azure tenant or manually create your own Azure application. See [our documentation](#) for more information.

Automatic Setup ^

Log in with your Microsoft Global Administrator account to automatically set up BreachQuest BEC

- ✓ Waiting for login consent
- ✓ Creating authentication client
