BRENNAN DIGITAL
Leading business transformation

Azure AI
QUICK START

BRENNAN QUICK START.

Getting the best from your people – and for your customers – means getting the most from your technology. But as the technology mix multiplies, the complexities grow.

It's why we've created **Quick Start**, a suite of comprehensive toolkits that span Microsoft's applications and solutions ecosystem, each packaged in a way that streamlines operations, lifts connectivity, turbo-charges efficiencies, and pushes business productivity forward.

Pre-scoped, pre-priced, and pre-proven, our Quick Start solutions are a savvy and cost-effective way to deliver maximum business impact with minimal operational risk – all backed by Brennan's unwavering service delivery.

A VALUABLE TOOLKIT TO PROPEL YOUR BUSINESS FORWARD.

FAST TRACK
Packaged solutions to accelerate your digital transformation with confidence with solutions we deliver every day

GREAT OUTCOMES
Delivers great value for your business including the platform, environments, deployments, the core solution, and customisation and configuration to meet your unique requirements

FIXED PRICES
Solutions designed to reduce risk and guarantee great outcomes in a fixed price and fixed scope engagement

AZURE AI

Build your own Copilot using Azure AI and use AI and ML to automate complex manual business processes and information retrieval.

Ideal for Customers looking to: Quickly create and deploy chatbots tailored to your brand and users, harnessing Azure's streamlined services; maintain secure control over sensitive data; seamlessly connect with Azure services and third-party apps; utilise Azure's AI for natural language understanding and learning; reveal user behaviour insights to inform smarter data-driven decisions.

Capabilities: A chatbot tailored to your unique needs (branding, user experience, functionality); information retrieval with conversational AI on your own data; the ability to customise the solution to meet security, governance, and AI policy requirements; the option to use files, databases, and images as data sources; the flexibility to use different AI models supported by Azure OpenAI.

Azure AI can use files, databases, and images as sources of data, and you have the flexibility to choose from a range of AI models.

Quick Start Package

AI Roadmap and opportunity assessment

Readiness assessment and environment review

Beginner chatbot training workshop for 5 users

Customised chatbot for information retrieval
