AZURE CLOUD ASSESSMENT AND MIGRATION

AZURE MIGRATION APPROACH

High Level Assessment of workloads being migrated to gain clarity of scope, complexity, supportability, and estimated costs.

This will also take in review the any existing tenancies.

Design and Build \ Reconfigure Azure Landing Zone aligned to Microsoft Best Practice (Cloud Adoption) Well Architected Framework)

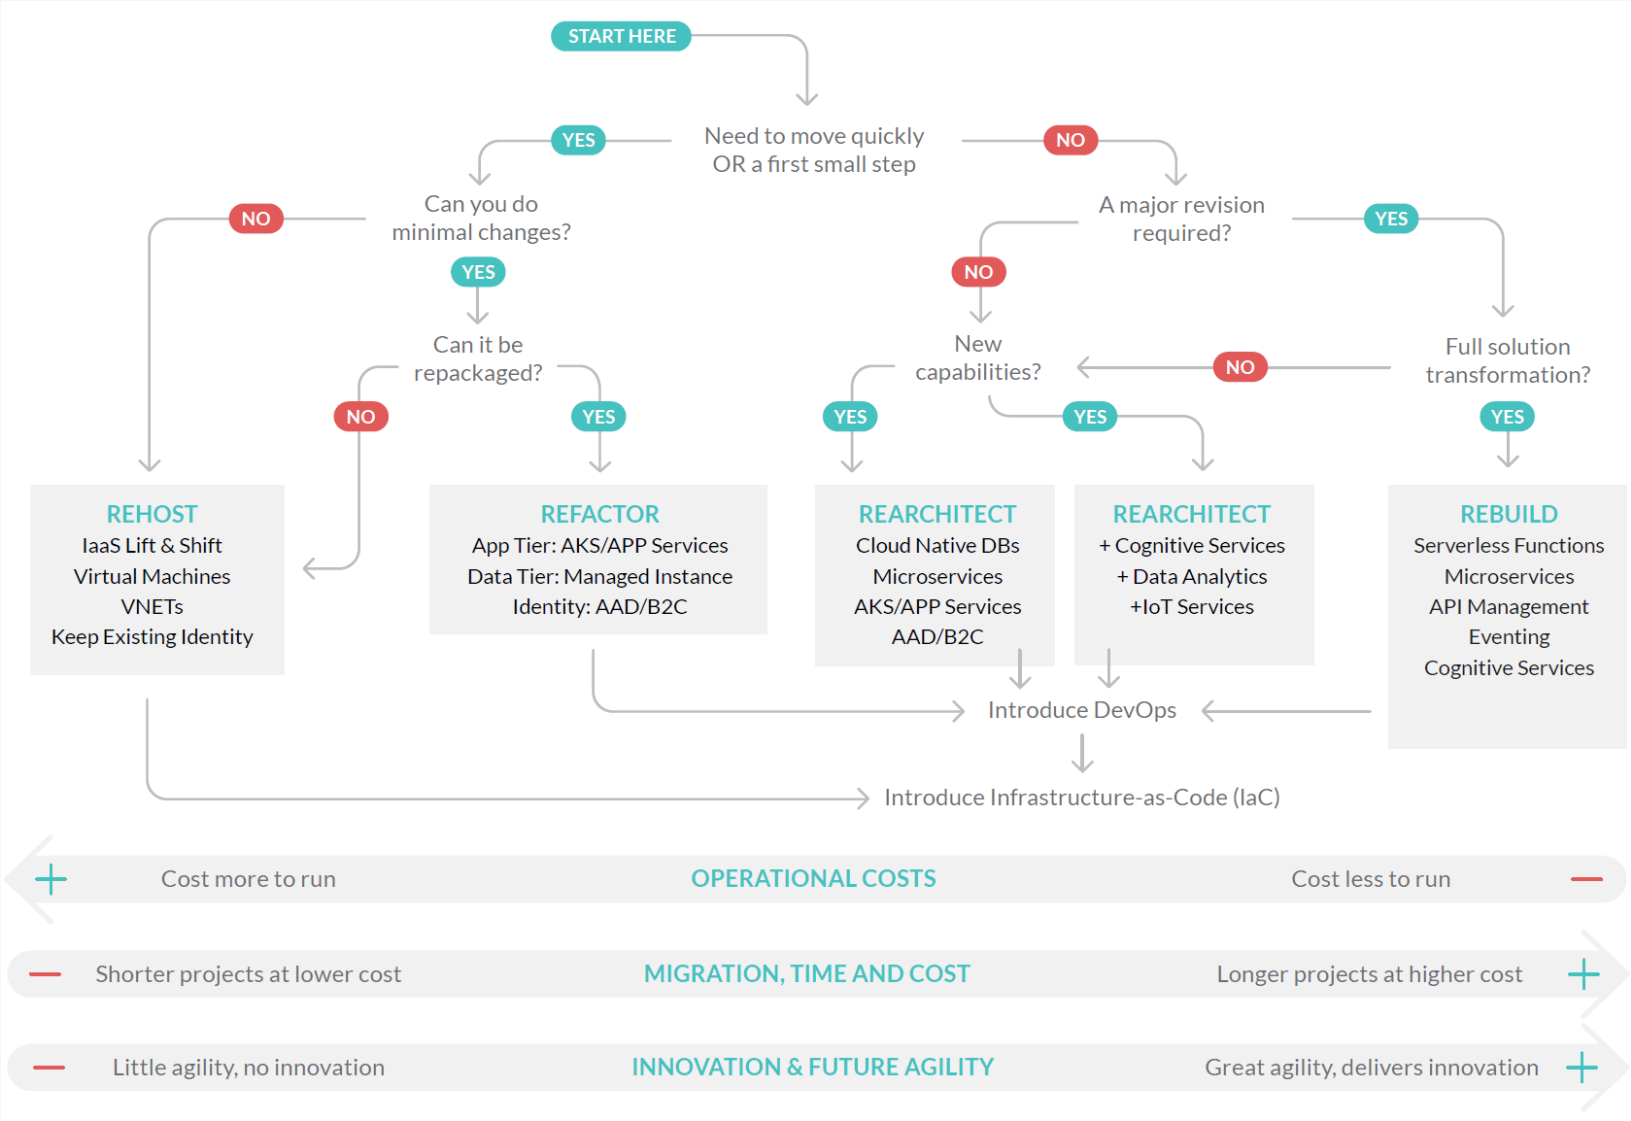

Ensures platform adheres to Security, Governance, and required compliance standards.

Migration waves of workloads from customer data centre to Azure, respecting key business services with hyper care and full user acceptance testing.

Optional Onboarding Brennan Managed Services for operational support.

[Virtual Cloud Engineer](#) is a subscription service that proactively optimises the customer Azure estate for Cost, Security, and Governance – leaving your team free to focus on your business.
