

## About Us

Brevi assistant is the world's first AI technology able to summarize various document types about the same topic with complete accuracy. Our Natural Language Generation technology abstractly summarizes multiple documents to create a meaningful, accurate, and relevant summary of a given subject. Brevi assistant algorithm uses the same method/approach that humans ultimately use to synthesize and summarize documents.

Any text content, which is consumed and produced by a company, whether it is internal or external, can be structured using natural language generation technologies. So Brevi assistant is here to help you and your teams deal with messy text data and paperwork.

The essential features of our solution are:

- **Summarize various business reports:** automate repetitive and time-consuming tasks for better efficiency and create a collaborative environment between different teams.
- **Knowledge extraction and creation:** empower your analytics team and other departments to reuse existing data;
- **Create content from multiple documents like newsletters, product descriptions, etc.:** make data comparison faster and easier with all necessary information in front of your eyes at the same time;
- **Analyze content trends:** - reduce time spent on routine activities and increase the effectiveness of their data analysis;
- **Analyze reviews, feedback, etc.:** - understand the nature of customer complaints, strengths and weaknesses of your product/service, and much more;
- **Analyze competitors' content:** - determine what your target market wants and how they are thinking;

Structuring and analyzing text data from multi-document sources can help organizations and entrepreneurs gain deeper insights into what their customers are looking for. Whether it's understanding the nature of customer complaints, highlighting rivals' strengths and weaknesses, or figuring out the most popular product niche, text data analysis can unlock significant value for insight-hungry companies.

### Brevi assistant description

The Brevi Assistant is a multi-document summarization tool developed by Brevi Technologies. It helps business users understand, analyze, find trends and create content from multiple text documents, such as business reports, reviews, feedback, newsletters, and much more.

The result? Less busy work. Less reading. Less stress.

Brevi assistant can accurately identify and extract key points from multiple text documents with its natural language generation software and summarize multi-document texts into one concise and abstractive form with unprecedented precision.

Using advanced semantic analysis technology, Brevi connects ideas and generates meaningful ideas from internal/external knowledge to deliver insights that will help you stay on top of your business.

By feeding "Brevi assistant" with different documents on a given subject, you can quickly get the abstractive summaries. This application makes it possible to get essential information quickly and easily to analyze further and save tons of your employees' time and your money. Brevi.app website is straightforward to use; you need to create an account to have your library on Google Cloud and follow simple steps to start using this cutting-edge technology. Also, they have a free trial of three free summaries.

You can upload files in different formats like Word Documents, PDF Documents, text, etc.

You can feed up to 18 documents at once on the same topic to generate a summary.

Brevi assistant helps out in many ways, doing whatever you want it to with your text-based data. Here are just a few of the ways you can use it:

Summarize business reports, create corporate wiki, create newsletters and analyze trends.
