

## AI ANALYTICS ACCELERATOR

4-6 Weeks | AI-Powered Insights on Microsoft Fabric

# TABLE OF CONTENTS

AI-Analytics Accelerator

- Challenges & Business Impact
- Our Approach (4-6 Weeks)
- What You Receive
- Engagement Details

# CHALLENGES & BUSINESS IMPACT

## AI-Analytics Accelerator

- Critical Business Data Remains Locked in Unstructured Documents (Contracts, Invoices, Records).
- Manual Extraction from PDFs and Scans is Slow, Costly, and Error-Prone.
- AI/ML Initiatives Fail Due to Missing Data Engineering Foundations, Pipelines.
- Business Users Lack Ability to Perform Natural Language Queries and AI-Driven Insights.
- Lack of Semantic Layer and Governed Data Foundation Blocks AI Adoption.
- LLM Integration Becomes Expensive Without Proper Orchestration and Control Mechanisms.

## BUSINESS IMPACT

- Unlocked Unstructured Data Value
- Reduced Manual Data Entry Errors
- Faster AI/ML Enablement
- Natural Language Analytics Access
- Governed AI & Data Foundation
- Controlled LLM Cost Management
- Improved Decision Accuracy
- Scalable AI Adoption Framework

# Our Approach

Our 4-6 Week Approach

Success

Progress

Exuberance

# OUR APPROACH

AI-Analytics Accelerator

## Week (1-2) - Data Foundation

- Identify Priority Unstructured Data Sources.
- Build Fabric Ingestion Pipelines For Documents.
- Set Up Azure OpenAI / Gemini Integration.
- Configure Bronze Layer For Raw Document Storage.
- Establish AI Governance & Usage Policies.

## Week (2-3) - AI Model Development

- Prompt Engineering For Extraction Accuracy.
- Multi-LLM Orchestration (OpenAI + Gemini).
- Entity Extraction & Classification Models.
- Human-In-Loop Validation Workflow.
- Accuracy Benchmarking (Target >90%).

## Week (3-5) - Integration & Analytics

- Auto-Populate CRM/ERP From AI Extraction.
- Silver Layer Structured Data From AI Output.
- Power BI Dashboards On AI-Extracted Data.
- Anomaly Detection & Alerting Rules.
- API Endpoints For Downstream Systems.

## Week (5-6) - Tuning & Handover

- Model Accuracy Optimization.
- Cost Optimization (Token Management).
- Team Training On AI Workflow.
- Runbook Documentation.
- Production Cutover & Hypercare.

# What You Receive

Our 4-6 Week Approach

# WHAT YOU RECEIVE

AI-Analytics Accelerator

## AI Extraction Pipeline

Production Azure OpenAI + Fabric pipeline that automatically extracts structured data from your documents (contracts, invoices, forms) at scale.

## Multi-LLM Orchestration Layer

Intelligent routing between Azure OpenAI, Gemini, and open-source models to optimize accuracy vs. cost per document type.

## Structured Data in Fabric Lakehouse

Clean, validated data automatically populated into Fabric from AI extraction — ready for analytics and downstream system integration.

## Power BI AI Insights Dashboard

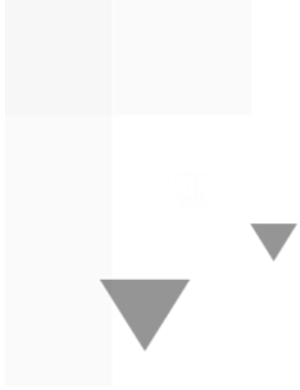

Real-time dashboards showing AI extraction accuracy, document processing volumes, anomalies flagged, and revenue impact metrics.

## AI Governance & Cost Framework

Prompt library, token budget controls, accuracy tracking, and responsible AI policy documentation for enterprise compliance.

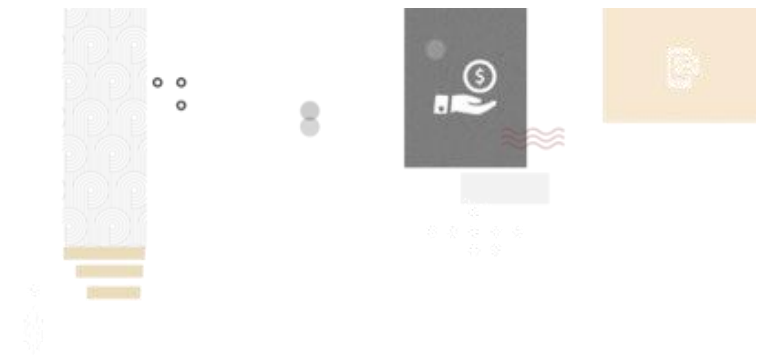

# ADJUSTABLE INVESTMENT

- \$40K Fixed Price.
- 18% Avg. Organic Revenue Growth.
- >90% Target Extraction Accuracy.

## READY TO START?

\$40,000 Adjustable Fixed Price | Delivered in 4 – 6 Weeks

| **THANK YOU**
