## **FABRIC ARCHITECTURE ASSESSMENT**

3-Day Assessment for Microsoft Fabric Architecture Design and Recommendations

# TABLE OF CONTENTS

3-Day Fabric Architecture Assessment

- Challenges & Business Impact
- Our Approach (3-Day Plan)
- What You Receive
- Engagement Details

# CHALLENGES & BUSINESS IMPACT

## 3-Day Fabric Architecture Assessment

- Stakeholders request dashboards but no unified semantic layer or data governance exists.
- No Fabric migration roadmap aligned to business goals.
- Competing data tool vendors creating architecture confusion.
- Data silos between operational systems and reporting layer.
- Shadow BI: Uncontrolled Power BI proliferation with no governance.
- Executive pressure to show ROI on Microsoft licensing investment.
- Budget is committed but architecture decisions are delayed due to lack of expert guidance

## BUSINESS IMPACT

- Business Goals Alignment
- Migration Roadmap
- Clean Architecture
- Unified Reporting Layer
- Scalability and Agility
- Department-Level Business Outcomes
- Data Governance and Security
- Lower Total Cost of Ownership

Exuberance

# OUR APPROACH

## 3-Day Fabric Architecture Assessment

### Day 1 - Discovery & Current State

- Stakeholder interviews: IT, Finance, Operations
- Inventory existing data sources, pipelines, reports
- Map business KPIs to available data.
- Assess current Microsoft licensing (F-SKU, P-SKU, A-SKU)
- Document integration points and data volumes

### Day 2 - Architecture Design

- Design Fabric OneLake layer structure
- Define Medallion architecture (Bronze/Silver/Gold)
- Map source systems to ingestion patterns
- Identify priority analytics use cases
- Recommend Lakehouse vs Warehouse vs Mirroring

### Day 3 - Roadmap & Presentation

- Build phased implementation roadmap
- Prioritize quick wins vs. long-term builds
- Define team skills + training requirements
- Present findings to leadership with business case
- Deliver written assessment document

# What You Receive

Our 3-Day Approach

# WHAT YOU RECEIVE

## 3-Day Fabric Architecture Assessment

### Fabric Architecture Blueprint

Documented Fabric topology covering OneLake zones, compute workspaces, semantic layer design, and integration architecture.

### Current State Assessment Report

Gap analysis of your existing data stack versus Microsoft Fabric best practices, with risk and opportunity summary.

### Prioritized Implementation Roadmap

Phase-by-phase migration plan with effort estimates, dependencies, and business value scoring.

### Quick Wins Identification

3–5 immediate automation or reporting wins achievable in your first 30 days on Fabric.

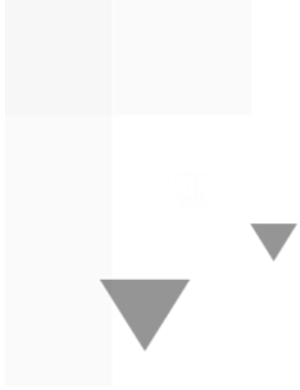

### Executive Briefing Deck

Board-ready presentation summarizing findings, recommended path forward, and expected ROI.

## ADJUSTABLE INVESTMENT

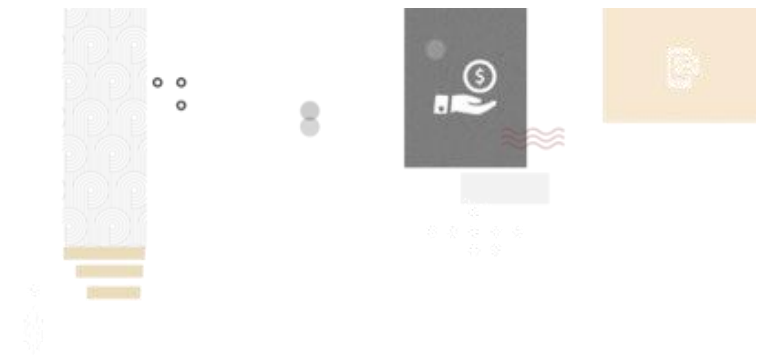

- 3 Days Fixed Delivery Timeline
- \$8K Fixed Price — No Surprises
- 5+ Deliverable Documents

💡 The \$8,000 fee is fully credited against any subsequent Brickclay engagement — Launchpad, Enterprise Build, or Migration — initiated within 90 days. If you proceed to Phase 2, the assessment costs you nothing.

## READY TO START?

\$8,000 Adjustable Fixed Price | Delivered in 3 Business Days
