Endpoint Security Posture Assessment

Secure your organisation's endpoints and safeguard users and data.

Our security consultants perform Endpoint Security Posture Assessments (ESPAs) using industry-standard benchmarks like CIS to help organisations understand and improve the security configuration of their devices (e.g., Windows, macOS), minimising risk and ensuring compliance.

Common Challenges

Configuration Drift

Device settings deviate from secure baselines over time due to updates, user changes, or lack of oversight.

Benchmark Complexity

Implementing and verifying adherence to detailed CIS Benchmarks across diverse devices is challenging.

Evolving Threats

Endpoints remain prime targets; maintaining hardened configurations against new attack vectors is crucial.

Limited Visibility

Difficulty in getting a clear, consistent view of the actual security posture across all managed devices.

Resource Constraints

Security teams often lack the dedicated time or specific expertise for in-depth device configuration audits and remediation planning.

How Bridewell Can Help

Identify Key Risks

We pinpoint critical security weaknesses in your device configurations based on CIS Benchmarks and best practices.

Prioritised Remediation Plan

Receive clear, actionable recommendations prioritised by risk, enabling efficient use of resources.

Benchmark Alignment

Understand your compliance level against recognised standards (e.g., CIS Microsoft Intune for Windows 11 Benchmark) and get guidance to improve.

Independent Validation

Get an objective assessment of your device security posture, tracking improvements over time.

Enhanced Security Posture

Strengthen endpoint defences against malware, unauthorised access, data loss, and configuration-related vulnerabilities.

Schedule a Consultation with Our Team

To learn more about our Endpoint Security Posture Assessments, speak with one of our account team today.

Assessment Areas (Based on CIS Benchmarks)

Our ESPA typically reviews configurations across key benchmark categories, including:

Account Policies & Access Control
(Passwords, Lockout, UAC, User Rights, LAPS)

Operating System Hardening
(System Settings, Services, Network Configs, Admin Templates)

Security Services Configuration
(Defender, Firewall, BitLocker/ FileVault, Device Guard)

Auditing & Event Logging:
(Audit Policies, Log Settings, PowerShell Logging)

Privacy & User Interface Controls
(Telemetry, Lock Screen, Autoplay, UI Features)

About Bridewell

Bridewell is the trusted cyber security partner for organisations operating within Critical National Infrastructure (CNI), as well as companies who want the highest standard of cyber security.

Our team are highly accredited by major industry bodies and have extensive experience of delivering cyber consulting and managed security services across highly regulated sectors. As a long-standing Microsoft partner, our team are experts in maximising the effectiveness of Microsoft Security technology to deliver robust and effective solutions.

We have a deep understanding of the challenges faced by CNI organisations and how to resolve them. We work in continuous partnership with our clients to implement the right security solutions to defend and protect them against threats and attacks, allowing them to continue operating safely and securely.
