# Bridewell

## Azure Defender For IoT Proof of Concept

**Gain visibility into your operational technology with our Azure Defender For IoT Proof of Concept, and benefit from Bridewell's experience to unify SecOps with Azure Sentinel SIEM.**

### Supporting a Successful PoC

Leveraging Bridewell's experience in providing services to critical national infrastructure, we help you gain rapid insight into your OT/ICS security posture. By deploying Azure Defender For IoT, integrated into Azure Sentinel, you can combine IT and OT into a single SOC for unified visibility and increased efficiency.

Throughout the engagement, the solution is managed with threat detection and response by our leading UK-based SOC.

### What's Included

**Success Driven PoC**
To align to your goals, we first understand your business and its drivers in order to agree success criteria

**Low-Risk Deployment**
Using just a network SPAN port, gain instant visibility with the deployment of local OT sensors. Integration into an existing or test Azure Sentinel SIEM

**Delivery Automation**
A successful PoC requires a solution that is designed to fit into your business and not just your tools. Improving the UX or automating these adds real value to the deployment

**Threat Detection**
We assign a 9 to 5 team to manage the alerts and incidents within Azure Sentinel, informing the client if anything critical is identified during the PoC

# Solution Outcomes

- A no-impact deployment with instant visibility
- Increase discovery of your OT assets
- Understand vulnerabilities in your OT assets
- Map communications between OT tiers and assets
- Integrate into a SOC for visibility of PLC and network threats

**What Our Customers Are Saying**

"Bridewell have been exceptional. We have quickly moved from an operation that is fighting noise with the incumbent, to having actionable incidents and increased visibility."
