Bridewell

Microsoft Defender for Cloud Proof of Concept

Review and optimise your organisation's implementation of Defender for Cloud by leveraging the expertise of a leading cyber security services provider. By understanding your organisation's specific cloud architecture, security concerns and requirements, our consultants will guide you in making the most effective use of Defender for Cloud to improve your cloud security posture and support specific business outcomes.

Common Challenges

Cloud Posture Constantly Evolving

Cloud environments gain new features at a rapid rate, making it difficult to maintain best practice whilst maximising new capabilities.

A Steep Learning Curve

New features within Defender for Cloud often require additional knowledge to implement correctly without business disruption or degradation to services.

Limited Resources or Skills

In-house security teams can be overwhelmed by the number of updates in their cloud environments, especially if they are already tackling 'firefighting' activities.

Low Return on Investment

Organisations not using all available features within Defender for Cloud can rarely maximise their return on investment.

How Bridewell Can Help

Tailored Workshop Content

Our workshops demonstrate the complete capabilities of Defender for Cloud and how it can address your organisations specific needs, requirements and goals.

Streamlining Operations

The workshop highlights how your organisations can consolidate and optimise existing security technologies to streamline operations and reduce complexity.

Improved Return on Investment (ROI)

The workshop will provide guidance on effectively utilising all Microsoft security solutions available under your current licensing to mature your security posture.

**Proven Methodologies and Best Practice**

Bridewell can provide insights into best practice for deployments based on a decade of experience delivering the UK's largest deployments of Microsoft security technologies.
