Bridewell

Purview Information Lifecycle Management

Take control of your data from creation to deletion with Bridewell's Information Lifecycle Management service. Combining deep expertise in Microsoft Purview with security consultancy, Bridewell delivers actionable guidance and hands-on support to embed Information Lifecycle Management from pilot to full enterprise-wide deployment.

Common Challenges

Inconsistent Classification

Data is often mis-labelled or left unclassified, making it hard to apply the right retention or protection policies.

Policy Complexity

Managing multiple retention rules across departments and systems can lead to confusion and compliance gaps.

User Adoption

Employees may not understand or follow data handling policies, especially if the tools aren't intuitive.

Data Sprawl

Uncontrolled growth of data across platforms makes it difficult to track, govern, and dispose of information effectively.

How Bridewell Can Help

End-to-end control for your data

Automatically classify, retain, and dispose of data across Microsoft 365—ensuring compliance, reducing risk, and supporting your governance strategy.

Built-in intelligence, effortless compliance

Apply retention labels, automate disposition reviews, and manage records seamlessly—so your teams stay focused while your data stays protected.

Optimised for scale and simplicity

From emails and documents to Teams chats and SharePoint files, Purview helps you manage data growth, reduce storage costs, and meet regulatory requirements with confidence.
