INTELLIGENT BUSINESS SOLUTIONS

ACCELERATE WHAT MATTERS. **NOW.**

CONTENTS

Modern Enterprise Challenges

Business Innovation @Scale

Redundant systems & Associated cost

Integrations & Content Transformations

Business Data Security and Vulnerabilities

Consistent Customer Centricity

Staying at competitive advantage

SENSE OF URGENCY

Low Code development market will grow to USD 27.23 Billion by 2022, at a Compound Annual Growth Rate (CAGR) of 44.49% and will be responsible for more than 65 percent of all app dev activity by 2024- **Gartner**

WHY MICROSOFT POWER PLATFORM

Power Platform brings together the power of four robust tools under a single ecosystem thanks to Common Data Service (or CDS), which is essentially the underlying data platform that provides a unified and simplified data schema so that applications & services can inter-operate

POWER APPS
Low Code Application Development for Web & Mobile

POWER AUTOMATE
Automate & Integrate your processes

POWER VIRTUAL AGENTS
Create Intelligent & Conversational bots in minutes

POWER BI
Business Analytics solution to present your data like never before

- Build low code business apps in weeks **with 70% reduced** development costs
- **3x Speed to market** with and quick On The Go services
- Drive operational efficiency by **38%** through NoOps
- Co-creation and innovation with Business to improve ROI

- **Improve process efficiencies by 15%** through process streamlining
- Achieve **productivity gain of up to 35%** through process streamlining and digital automation.
- Easily integrate with **275+ services and systems**
- Faster and better decision making with mobility support

- **Engage naturally**, free up human focus for complex matters
- **Democratize AI**, empower Business SMEs to create Bots
- **Continuously Improve**, as AI recommends the topics to improve bot performance

- Contextually relevant data insights deliver up to 12% of one-time productivity optimization
- **Self-service BI model** leads to significant IT cost reduction
- **27% faster** time to insights

The Power Platform enables data democratization – the ability for digital information to be accessible to the typical (non-technical) end user

Low-Code platforms are easy to use, then where is the problem?

ENVIRONMENT SCALABILITY
Management, maintenance and scalability of the apps being built

GOVERNANCE & LACK OF VISIBILITY
Of what the employees are building

SENSITIVE DATA LOSS/LEAKAGE
Business logic problems that inappropriately generates or expose data

MANAGING LEARNING CURVE
For the Citizen Developer Community to ensure quicker adoption and optimal usage

WE SET YOU UP FOR SUCCESS!!

Our frameworks, enablers and accelerators help overcome the challenges and set the enterprise on a path to success..

ARCHITECTURE BLUEPRINT FRAMEWORK

- Proven framework to derive your Power Platform environment strategy based on the intended **usage** and **use cases**
- Set up enterprise for **success** with the right environment strategy which allows **scalability** & easy **maintainability**

CENTRALIZED GOVERNANCE TOOLKIT

- A **one-click** dashboard for the entire Power Platform ecosystem with ability to take **actions** and optimize the resource utilization
- Gives a 360-degree **visibility** to all aspects of the platform and proactively identify potential risks and problem areas

INTELLIGENT INTAKE PROCESS

- A Day 0 deployable platform intake process and demand management framework
- Allows you to bring in necessary checks and controls
- Adequately harness the platform potential & calculate the business value delivered

AUTOMATED BUILDS, DEPLOYS & TEST

- Automated Build, Deploy & Test toolkit using Microsoft Power Platform Build Tools for Azure DevOps
- Manage the application lifecycle of apps built on the Power Platform
- Gives power to your business users to independently perform builds & deploys

CITIZEN DEVELOPER PROGRAM

- Program for platform orientation of the **business champions** to Power Platform
- **Hands-on** crash course for learning to develop business applications using Power Platform.
- **Gamification**, in creating learning content, fun & engaging experience to increase adoption across all user personas

Driving agility by enabling enterprises with quick launch apps

KEY OUTCOME & VALUE DELIVERED

KEY OUTCOMES OF OUR APPROACH & METHOD

UNPARALLED TIME-TO-VALUE

- Rapidly deliver apps that your business needs
- Enable faster decision making among cross-functional teams with baked-in collaboration tools
- Improve developer productivity with low-code attributes
- Enable faster decision making among cross-functional teams with baked-in collaboration tools

NEW WAY OF DEVELOPMENT

- Break down silos to foster a strong business-IT partnership
- Empower citizen developers throughout the organization to build applications and contribute
- Stay agile to respond quickly to changing business and customer needs

BUSINESS INNOVATION

- Upshift IT transformation by going beyond traditional journey to create & orchestrate outcome-based strategies
- Co-innovate in democratizing data and platforms, allowing companies to scale more & and reduce barriers
- Accelerate business innovation & digital transformation by co-creating the business solutions alongside business champions through autonomous squads

BUILD MORE @ SCALE

- Develop variety of solutions ranging from process automation apps to mission-critical systems modernization, without incurring heavy costs
- Deliver continuous improvements to end-users with engaging web, mobile, conversational, or immersive experiences
- Build maintainable solutions that are easy to scale on cloud-native architecture

ACCELERATORS

Brillio aims to accelerate the enterprise journey to a self-service business platforms to drive IT cost efficiencies

WHEN & HOW TO ENGAGE US

WHEN TO ENGAGE US

Existence of manual or poorly designed apps & processes with no controls or governance

Need for platform/tools consolidation to help reduce CAPEX & OPEX

Decommission legacy or out of support platform & tools
Faster time to market is key to success

There are complex integration needs between the LOB or Corporate systems

Need consulting & advisory assistance to ensure you start right on the low code platform

Rapid application and process modernization is the need of the hour
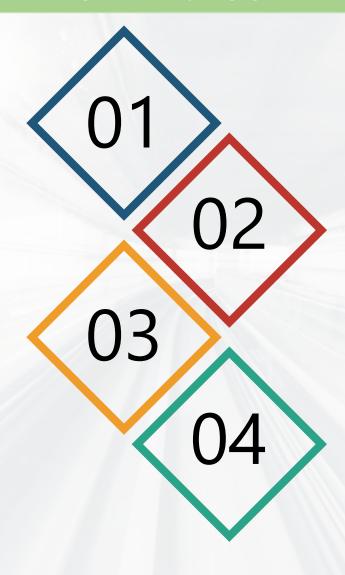

SUCCESS STORIES

PowerApps & SharePoint solution for US Based Distributor of Specialty Building Products

OBJECTIVE 🎯 This engagement is aimed at automating various internal processes by implementing complex yet intuitive solutions via PowerApps and Power Automate.

Solution Highlights

- Automation of various clients's internal processes (such as Vendor Management System, CapEx Asset Acquisition Request Process, Asset Transfer and Disposal, Logistics Acceleration Program, Daily Wellness Certification process, etc..)
- Implement quick solutions on SharePoint Modern design and framework, and also support existing implementations such as clients Intranet and IT Portal. Provisioning SharePoint site-collections with Org. specific branding and structures for specific areas on need basis

Impact

- 100% Automation of 5 manual processes via **Power Apps and Power Automate**... more in pipeline
- Significantly **improved Customer Experience** through a unified design approach for all the apps
- **Reengineered** poorly performing pre-existing apps to better models under the wrap of MS Best Practices
- Increasing user **Adoption** of SharePoint by enabling users to explore and contribute

Delivered Return To Workplace App Using Power Platform

OBJECTIVE During the Covid-19 situation, Client wanted a system which could allow its employees to book reservation for visit to office. To enable its employees and considering the changing state regulations, a system was required to be up and running in a very short span of time, high level of configuration and a web responsive system which could seamlessly work in any device.

Solution Highlights

- 16+ sites to be managed with multiple floors across each sites

- Based on the internal layout of the floor specific seating allocation restrictions per floor.

- Different time-slots for various sites based on the working hours (2-hour slots, 4-hour slots and 6-hour slots)

Key Highlights

- Brillio as-an Engineering partner provided end-to-end solution/architecture which includes ideation, concept, UX prototype, App development to prod go live/support.
- Speed and agility were demonstrated in creating clickable UX prototypes to provide end to end view of application in 2 days and the MVP version was released in 2 weeks.
- As the client already has M365 platform in use which is a low code platform with the right set of tools and solutions, so Brillio leveraged Power platform with User interface/business logic developed in Power Apps, Backend data store in SharePoint and process flows in Power Automate.
- App was designed to scale to different locations and accommodate changing state regulations through configurable properties which were easy to use and maintain by business users

Impact

- Complete app implemented in a **mere 2-week time span**
- Central repository for all employee office visit details

LET'S BUILD SOMETHING AMAZING TOGETHER...
