

Microsoft Defender for Endpoint

A unified endpoint security platform for prevention, post-breach detection, investigation, and response.

Microsoft Defender for Endpoint is a complete security solution powered by the intelligent cloud that protects endpoints from cyber threats, detects advanced attacks and data breaches, automates security incidents, and improves security posture. It offers a rich set of APIs to build integrated solutions. Security and data privacy are the priorities of the platform.

Managed Endpoint Microsoft from BT is a comprehensive managed security service wrap for Defender for Endpoint

We provide managed security services to customers all over the world and have the technology and intelligence to spot and tackle cyber threats before they become the stuff of headlines. The expertise that comes from how we protect BT from over 200,000 attacks per month, and the many years of defending ourselves, has allowed us to develop the unique tradecraft that we use to secure our customers.

Every day we protect our customers in the same way we protect ourselves, we want you to join us so you will be protected too.

THE BENEFITS OF A MANAGED SERVICE FROM BT

- 24x7x365 monitoring of your Microsoft Defender for Endpoint estate – to ensure round the clock cyber threat protection for every endpoint connecting to your network.
- Skilled analysts from our network of security specialists supporting your organisation from our dedicated SOCs.
- Fine tuning of rules to minimise false positives and maximise threat hunting effectiveness.
- Dedicated reporting – to help you demonstrate regulatory compliance.
- Expert knowledge of Kusto Query Language (KQL) – to support effective data analysis.
- Choice of service level – consistency across all your BT security controls.
