

# CYTEX™

UNIFIED RESILIENCE PLATFORM

In today's rapidly evolving threat landscape, businesses face the daunting challenge of safeguarding their data and assets from cyber threats. The Cytex Unified Cybersecurity Platform is a first of its kind full-spectrum solution that addresses these challenges by providing an all-in-one suite of active security tools.

## AI Powered Cybersecurity to:

- ✓ Eliminate Application Sprawl
- ✓ Reduce Misconfiguration Risk
- ✓ Streamline IT Cost

# Advantages of the Cytex Unified Cybersecurity Platform

## Full-Spectrum Protection

Our platform offers a complete range of security capabilities, including a DNS firewall with Traffic Monitoring & Threat Blocking, Cyber Risk Scoring, Data Supply Chain Security, EDR, CSPM, DLP, ZTNA, and Phishing Simulator. This holistic approach ensures that your organization is protected from every possible angle, leaving no vulnerability unchecked.

## Simplified Cybersecurity

Eliminating app sprawl is a key feature of the Cytex platform. By consolidating multiple security solutions into one integrated platform, we streamline your cybersecurity infrastructure. This simplification reduces complexities, minimizes potential gaps, and allows for a more centralized and efficient security management.

## Enhanced Efficiency

With a unified platform, the burden of managing multiple tools and vendor relationships is eliminated. This efficiency translates to optimized workflows, faster threat detection and response, and reduced operational overhead. As a result, your IT and security teams can focus on strategic initiatives, rather than firefighting.

## Cost Effectiveness

The Cytex Unified Cybersecurity Platform offers significant cost savings. Combining various security solutions into one reduces licensing costs, training expenses, and hardware requirements. Additionally, the elimination of redundant tools leads to better resource utilization, ultimately resulting in cost-effectiveness for your organization.

## Framework Automations

We understand the importance of compliance in today's regulatory landscape. The platform provides automation for various frameworks like SOC 2, CCPA, PCI, FINRA, GDPR, HIPAA, CIS, NIST CSF, NIST 800-53, ISO 27001, OFDSS, and CMMC. These automations ensure that your organization stays in compliance and avoids potential penalties, saving you time and resources.

**The Cytex Unified Cybersecurity Platform keeps your organization at the leading edge of the cybersecurity landscape while optimizing resources & reducing costs. Make the smart choice and move to Cytex to fortify your cybersecurity posture.**
