# SProbot

Take control of your SharePoint content.

SProbot's assessment and admin tools help you to control access, prevent sprawl and oversharing, and improve discoverability.

Content assessment and cleanup

AI-powered assessment highlights the content in your tenant which requires attention.

- Automatically archive inactive sites and teams
- Track down large lists and files
- Identify and secure sensitive financial and personal files
- Find and remove test and trivial content

Provisioning with powerful governance

Configure granular governance rules to define who can create sites and teams and how they're managed.

- Detailed templates include structure, settings and permissions
- Define naming conventions per template
- Enforce ownership and security settings
- Target the ability to create to specific individuals or groups
- Require approval before sites or teams are provisioned
