

Bugendaitech PowerApps Service

Get Started →

What We Do:

Power Apps

- A low-code platform for building custom business applications.
- Connects seamlessly with Microsoft and third-party services.
- Apps are optimized for mobile devices.

Power Automate

- A service for automating workflows across applications and services.
- Connects with a wide range of apps and services.
- Uses triggers to initiate workflows and actions to perform tasks.

Power Pages

- Allows easy website creation with minimal coding.
- Integrates seamlessly with Microsoft Dataverse.
- Offers extensive options for branding and functionality

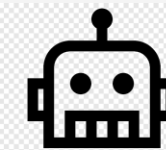

Power BI

- Creates interactive dashboards and reports.
- Connects to various data sources.
- Supports natural language queries and AI-driven insights.

Copilot

- Assists in generating text and emails.
- Automates routine tasks within Microsoft 365.
- Provides contextual suggestions to enhance productivity.

Slot Booking

This application allows users to book open slots anytime, see what's available immediately, and receive reminders so nobody misses their appointment. Users can also easily access past appointments and stay organized.

Differentiators:

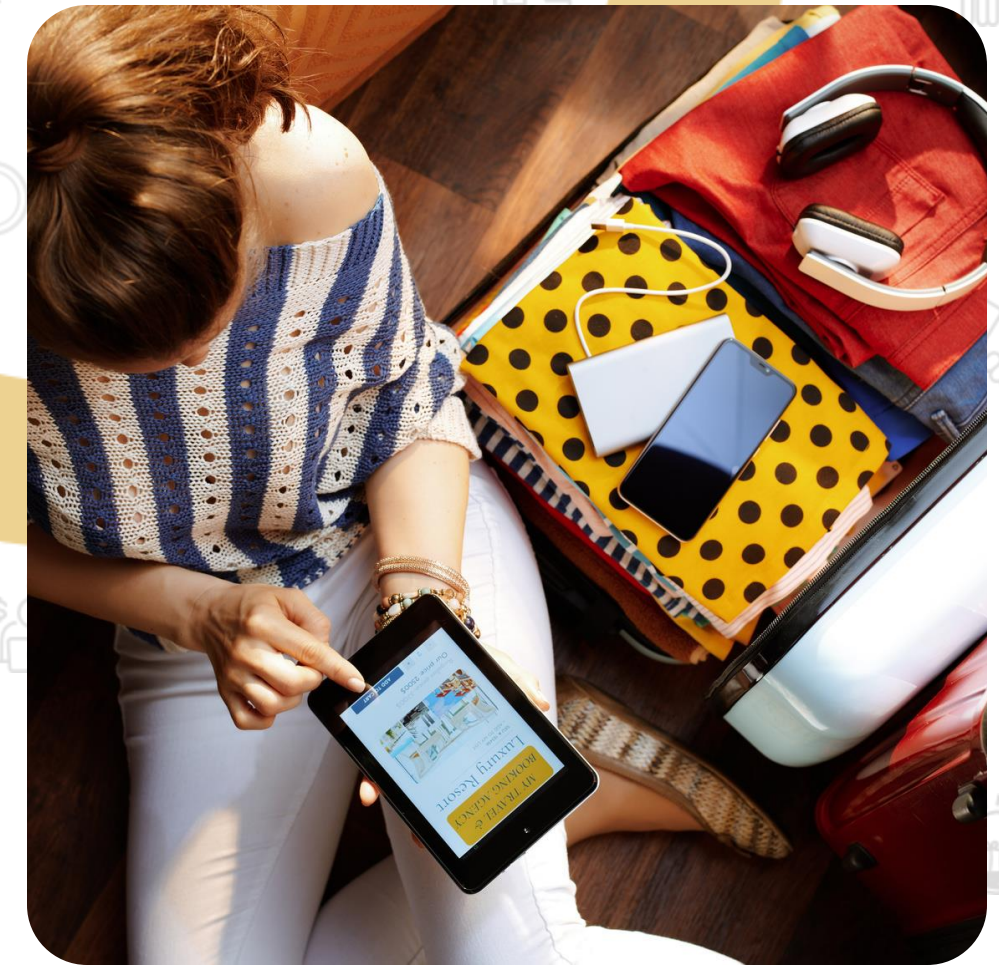

- Simplified Slot booking process
- Reduced missed appointments by 85% with automated reminders.
- Automated the process to improve time management by 50% and to reduce human intervention by 75%.
- Excel Download Functionality

Tech Used

PowerApps, Power Automate, Outlook

N/A

Sprint Manager (Internal)

This app has been created for efficient project and task management. It allows employees to enter project and task details for each month, streamlining the tracking process.

Differentiators:

- **99% Reduced Data Manipulation:** Employees cannot edit critical details like deadlines and task completion.
- Real-time notifications upon task assignment to keep everyone informed increased communication by 80%.
- **Automatic Audit Trails:** The change made to project status is logged, creating an immutable record of activity.
- **Time-Stamped Updates:** The comments on the task are captured with date & time

Sprint Manager

Frontend UI

- Power Apps For UI Design
- Power Automate & Outlook to develop the mail triggering functionality

Backend Data Storage

- Used SharePoint lists to store the data

KPI Tracking Tool (Internal)

PowerApps solution to effectively track Key Performance Indicators (KPIs) on a quarterly basis.

Differentiators:

- **Simplified Data Collection:** Employees can easily submit self-assessments directly within the app.
- **Real-Time Notifications:** Managers receive immediate alerts upon submission, enabling prompt review and feedback.
- **Automated Calculations:** The app automatically calculates overall performance scores based on pre-defined formulas and weightings.
- **Transparent Communication:** Both employees and managers have instant access to review forms, ratings, and feedback, promoting transparency and accountability
