

Managed cybersecurity breach detection, investigation and response

ABOUT BUI Cyber MDR

BUI is an award-winning IT consultancy and Microsoft Partner, delivering Microsoft solutions with a focus on security, specialized cloud services, and data-center support to mid-market and enterprise-level customers. Through expert consulting, BUI enables customers to make the journey to the cloud with innovative use of technology.

An affordable and scalable enterprise grade, cloud monitored and managed cybersecurity breach detection, investigation and response service. BUI's cybersecurity experts continuously monitors your managed assets for potential and existing vulnerabilities, threats and breaches and have the expertise and tools to respond in minutes.

WHAT OUR CUSTOMERS ARE SAYING

“With BUI’s CyberSoC, powered by Azure Sentinel and Azure Defender for Endpoints, we have peace of mind, knowing that we are protecting ourselves against interruptions that could otherwise have dire consequences across several essential and critical support sectors that we service”

– Kevin Browne, CIO – Omnia
