BUI CLOUD BACKUP AS A SERVICE

ENABLING CLOUD BACKUP AS A SERVICE

Switching to a cloud-based backup solution is an important decision that requires a clear understanding of how such a solution will integrate into your business.

Cloud Backup delivers strong protection for customer data wherever it resides—in your enterprise datacentre, remote and branch offices, or the public cloud—while being sensitive to the unique requirements these scenarios pose.

Cloud Backup gives you cost-efficiency and minimal maintenance, consistent tools for offsite backups and operational recovery, and unified application availability and data protection. Benefits include:

- Lower total cost of ownership
- Improved reliability and speed of recovery
- More secure method of file transfer
- Reduced operating and administrative costs
- Smarter use of IT resources
- Stronger compliance safeguards
- Eliminates the shortcomings of tape backup

This offering includes the following deliverables:

- 1 One-day workshop to assess backup needs
- 2 Delivery service management and weekly reporting
- 3 Backup roadmap creation and quarterly reviews
- 4 12-month managed backup services
- 5 Standard Support Azure Storage for 10 Servers

Solutions available on the Azure Marketplace
