CYBER SECURITY CONSULTING

CYBER SECURITY CONSULTING SERVICES

Is Your Business Challenged Around Cyber Security and Identity Management? Success starts with security. Choosing the right security partner should never carry the same stress as having to deal with a security breach.

The most effective way to protect against exposure to vulnerabilities is to develop intelligence around your assets via assessment and to harden these systems to minimise your attack landscape.

The BUI team have in-depth knowledge and experience across several next generation solutions that are redefining the way that the world looks at information security.

This cover the key components such as:

- Exploit mitigation
- Business Continuity / Disaster Recovery (BC/DR)
- Lateral Traversal / Securing Privileged Access
- Attack Surface Reduction

This offering includes the following deliverables:

- 1 Multi-layered security where we ensure identity, on-premise & cloud based assets
- 2 Information Security gap assessment and remediation roadmap development
- 3 Cybersecurity testing and improvement service
- 4 Information security training and awareness
- 5 Platform and Network Security Assessments, Vulnerability Scanning

Solutions available on the Azure Marketplace
