

BUI | Cloud Managed Windows Virtual Desktop

An end to end managed Virtual Desktop experience – a complete server to screen WVD managed environment.

BUI has a proud partnership with Microsoft spanning well over 20 years. This partnership has gone from strength to strength where BUI has shown through resilience, dedication, and strong technical ability why we are Microsoft South Africa no 1 Partner in Cloud and Security.

Cloud Managed Windows Virtual Desktop enables businesses to work remotely on their applications with confidence that data remains secure. BUI leverages the Azure WVD, Identity and Office365 cloud services to expertly onboard Virtual Desktop Services with ongoing managed services. The service is industry agnostic, but we have had great successes in the Financial, Mining, Manufacturing, Retail and Professional Services industries.

WHAT WE OFFER

Discovery

Determine your virtual desktop needs, existing infrastructure and identify the correct WVD deployment strategy, load balancing and user profiles/application groups.

Walk away with a Windows Virtual Desktop on Azure Deployment Plan.
Plan adoption and decide sizing plan of WVD on Azure for your organization.

2-hr Design Workshop

Onboarding

Create and enable a secure Azure landing zone (WVD tenant) based on workload intensity and number of users.

User Access (Identity).

Enabling minimum security as per BUI best practices.

2-Day WVD Service Onboarding

Validation and Testing

Validation and testing of user experience and accessibility of Microsoft Modern Desktop Application Services.

Limited to 1 day.

1-Day Validation and Testing
* Testing of 3rd party applications excluded
