

BULLETPROOF 365E ENTERPRISE

END-TO-END MXDR
SERVICE POWERED BY
MICROSOFT 365,
MICROSOFT SENTINEL, &
HUMAN EXPERTISE

Most organizations already own Microsoft security tools—but lack the time, scale, or specialized expertise to fully operationalize them.

B365E closes that gap with a fully managed, Microsoft-native MXDR service that turns Microsoft Sentinel and Defender XDR into a proactive, always-optimized cyber defense operation—**unlocking greater protection, efficiency, and return on your existing investment.**

Outdated Security Isn't Just Risky - it's Costly

Delays in threat detection and response drive up costs, risk, and disruption:

- \$5.6M avg. breach cost
- \$500K/day downtime
- 4% of revenue in fines
- 3.5x higher risk from AI-powered threats
- Talent gaps = \$600K+ inefficiencies

"After we understood that we were indeed attacked we had Bulletproof on site and ready to support us in containment. When Bulletproof came on site, it was like they were part of the team; instant connection, working with them side by side."

Stephaine Rackley-Roach
Chief Information Officer
City of Saint John

PROTECTIONS THAT GO WAY BEYOND TRADITIONAL OFFERINGS

Microsoft-Native by Design

Bulletproof 365 Enterprise operates entirely within your Microsoft tenant—**no third-party data exports, no vendor lock-in.**

We unify Microsoft's security ecosystem across:

Microsoft Sentinel

Cloud-native SIEM
+ SOAR with
intelligent analytics
and automated
playbooks

Microsoft Defender for Endpoint, Office 365, Cloud Apps, Identity, & Servers

Integrated
protection across
devices, SaaS, and
workloads

Microsoft Entra ID Protection

Advanced Identity
Governance, MFA,
Conditional
Access, and PIM

24x7 SOC-as-a-Service

Bulletproof's **SOC 2 Type II-certified** operations centers in North America deliver **24/7 monitoring by Microsoft-certified analysts** — ensuring expert oversight and compliance you can trust.

We provide **continuous detection, validation, and response, powered by automated playbooks and ITIL-aligned workflows** for consistent, auditable, and scalable outcomes—reducing risk while supporting operational excellence.

Core Capabilities

E5 Defender Suite Implementation: Full deployment and optimization of Defender XDR, integrated through Entra ID and Intune

Threat Detection & Incident Response: AI-assisted correlation and expert-led triage using Microsoft Sentinel

Threat Intelligence & Hunting: Analyst-led, MITRE ATT&CK-aligned hunts enriched with global feeds

Dark Web Monitoring: Continuous surveillance to detect leaked credentials and brand risks

Drift Detection & SIEM Optimization: Automated misconfiguration detection via Bulletproof's Drift Detector

Vulnerability Management: Integrated Tenable.io scanning for unified visibility

Log Management & Reporting: Centralized collection, 90-day retention, and monthly SLA reviews

+ ADD-ONS

Managed Data Loss Prevention (DLP): 24x7 monitoring of DLP policies in Microsoft Defender for Cloud Apps and supported endpoints to ensure data protection and regulatory compliance

Security Awareness Training: Continuous phishing simulations and adaptive microlearning to strengthen user vigilance and reduce human risk

Advanced CTI & Threat Hunts: Deep-dive, hypothesis-driven threat hunts using industry-specific intelligence feeds and advanced analytics to uncover stealthy attacks

E5 Security Maintenance: Ongoing Microsoft security engineering advisory to maintain, optimize, and evolve your Microsoft 365 E5 security posture

Why Bulletproof?

Bulletproof 365 Enterprise reduces breach dwell time from months to minutes, cuts SOC overhead, and keeps all data within your tenant for **full control and compliance**.

With locations across North America and worldwide, Bulletproof brings decades of IT, security, and compliance expertise. We were named 2024 Microsoft Security Excellence Award Winner for Security Trailblazer and Microsoft Global Security Partner of the Year (2021), and are proud members of the Microsoft Intelligent Security Association (MISA).
