Copilot for Security Readiness Assessment

Learn How to Protect at the Speed and Scale of AI

What is Microsoft Copilot for Security?

An AI-driven security solution powered by generative intelligence, enhancing defenders' efficiency and capabilities to elevate security outcomes swiftly and on a large scale. This intuitive copilot experience, based on natural language, aids security professionals across various scenarios including incident response, threat hunting, intelligence gathering, and posture management.

The solution leverages the full power of OpenAI architecture to generate a response to a user prompt by using security-specific plugins, including organization-specific information, authoritative sources, and global threat intelligence. By using plugins as data point sources, security professionals have wider visibility into threats and gain more context, and have the opportunity to extend the solution's functionalities. Copilot for Security seamlessly integrates with products in the Microsoft Security portfolio such as Microsoft Defender XDR, Microsoft Sentinel, Microsoft Intune, as well as other third-party services such as ServiceNow.

Why Choose Copilot for Security?

Cybersecurity is a defining challenge of our times. The sheer numbers are staggering. Defenders are simply outmatched. Attackers have more resources and don't have to play by the same rules. Security professionals are up to huge challenge.

Looking to minimize the time required for your analysts to triage and address threats in your environment, while also providing support to your administrators in their daily tasks within Intune and Entra ID? Copilot for Security is an ideal solution for you. It seamlessly integrates with the Microsoft ecosystem, offering user-friendly features and template promptbooks.

4,000
Password attacks per second

72mins
Median time for an attacker to access your private data if you fall victim to a phishing email

3.5M
Global shortage of skilled cybersecurity professionals

Copilot for Security Readiness Assessment

The Bulletproof team will assist your organization in getting ready to implement Microsoft Copilot for Security in a way that is both manageable and tailored to your business needs. Designed for security analysts, managers, and IT professionals in the red & blue teams and for IT professionals and admins working on your Entra ID, Intune and Purview tools.

Our team will help you:

Assess your readiness for Copilot for Security

Assist you in accurately deploying Copilot for Security

Provide recommendations for your rollout

The Result

Using Bulletproof for your Copilot for Security deployment provides you with a greater understanding and confidence in the results of your deployment.

Enable response in minutes, not hours

Catch what other miss with deeper understanding of your enterprise

Simplify the complex with natural language prompts and easy reporting

Strengthen team expertise with cyber skills and promptbooks

About Bulletproof

With locations across North America and around the globe, Bulletproof, a GLI company has decades of IT, security, and compliance expertise. Bulletproof works with various industries of all sizes and leverages its extensive industry experience to mitigate risk and improve client processes, systems, and business infrastructure.

Named Microsoft's global Security Partner of the Year in 2021 for delivering excellence and innovative end-to-end security solutions, Bulletproof is also a member of the Microsoft Intelligent Security Association (MISA).
