

Microsoft Intune Readiness Assessment

Burwood Group's Microsoft Intune Readiness Assessment is a structured, expert-led evaluation that helps you navigate the shift from traditional on-premises tools like SCCM and Group Policy to a cloud-based solution. This three-week engagement provides a detailed assessment of your current environment and a clear path to successful adoption of Modern Device Management (MDM) with Microsoft Intune

Assessment Overview

Ideal For

- Enterprises and IT teams currently relying on SCCM and Group Policy
- IT leaders needing a clear, executive-ready roadmap
- Organizations planning to migrate to Microsoft Intune

Scope

This assessment is a hands-on, one-time project delivered by our consultants. We partner with your team through discovery workshops to analyze your existing endpoint management architecture, including SCCM, Group Policy, Active Directory, Azure, and Entra ID configurations.

- **Conduct a Gap Analysis:** We perform a technical gap analysis to compare your current capabilities with Microsoft Intune features and modern management standards.
- **Identify Risks and Dependencies:** We pinpoint key dependencies, risks, and integration considerations.
- **Evaluate Licensing and Costs:** We review Intune licensing models and provide budgetary proposals for both cost and duration to execute on our recommendations.

Deliverables

At the conclusion of the engagement, you will receive a comprehensive Readiness Report with the clarity and confidence needed to move forward. The deliverables include:

- **Executive Summary:** A high-level overview of our findings.
- **Technical Gap Analysis:** A detailed report on the gaps identified in your environment.
- **Recommendations:** Strategic recommendations for policy modernization, identity management, and cloud integration.
- **Budgetary Proposal:** A clear budgetary proposal and implementation timeline for your project.

Key Benefits

-  **Clarity**
-  **Insight**
-  **Confidence**
-  **Cost Visibility**
-  **Accelerated Results**
