Microsoft Catalyst Inspire - 1 Day Workshop

Together we will define a digital transformation path for your organisation using the proven Microsoft Catalyst Framework, with previous organisations using the Catalyst Framework showing a 9x return on their initiatives.

The Inspire stage is the first step on your Catalyst journey, the purpose of this 1 Day Workshop is to provide you the knowledge and insight you need to help uncover what the future holds for your organisation.

The Inspire stage consists of identifying what solutions currently exist within the organisation that would benefit from modernisation and showing you the capabilities of the tools that you might already have access to through your Microsoft 365 subscription.

At the end of this Workshop, you will have the following deliverables:

- An overview of the IDEA framework process
- A defined transformation journey plan
- Key milestones which will be supported by the next stages of the IDEA Framework

### What is Microsoft Catalyst?

Organisations big and small across the UK all have different challenges, from aging processes, redundant technology, and outdated workflows, and these hinder you and your employees more than you can imagine. Alongside the effects of the pandemic, we've all had to make some changes rather quickly to keep up with the new age of working from home, but these changes may have been rushed in, and are not built to last.

Enter the Microsoft Catalyst Framework, a design-led process which aims to define a digital transformation path for you and your organisation to follow, to uplift you into the ever-moving future of cloud-based technology. By Inspiring you with what could be, helping you Design your digital transformation, Empowering you and your organisation with the skills and knowledge on how to do so, and helping you Achieve your ideal business outcomes, the Microsoft Catalyst framework is your next step up into an ever-evolving technological space.

As a Catalyst certified Microsoft partner, our experts will get to know you and your organisation, how we can help you define what success is, identify key pain points and provide expert solutions.
