

Simplified SharePoint & Teams Adoption and Governance

Work with Business Cloud Integration to elevate productivity and reduce sprawl with automated provisioning and governance

Faster deployment, less IT effort,
more productivity.

Faster than requesting a SharePoint Site with a support ticket and waiting for IT to action.

Average number of organisations with active SharePoint and Teams sprawl that needs review

Customisable templates for SharePoint Online and Teams

The screenshot shows a Microsoft Customer Story page. At the top, there's a navigation bar with 'Microsoft' and various product links like 'Microsoft Security', 'Azure', 'Dynamics 365', 'Microsoft 365', 'Microsoft Teams', and 'Windows 365'. Below that, a search bar and 'Customer Stories' are visible. The main content area features a large hero image with a person's hands interacting with a digital interface. A dark box on the left contains the headline: 'PZ Cussons boosts deployment speed by 60 percent thanks to Casper365 SharePoint management, 'an absolute game-changer''. Below the hero image, the PZ Cussons logo is displayed. To the right, the date 'January 8, 2024' and a 'Print' icon are shown. A 'Learn More' button is also present. The main text describes how PZ Cussons, a British multinational manufacturer, used Casper365 to manage their SharePoint environment. It mentions that Casper365 is an intelligent Microsoft Azure-based automation solution. The text highlights the challenges PZ Cussons faced with SharePoint site sprawl and fragmented collaboration, and how Casper365 helped centralize management and governance. A sidebar on the left lists categories like 'Customer', 'Partner', 'Products and Services', and 'Industry'. At the bottom, there's a section titled 'Without governance, site sprawl and abandonment run rampant' and a brief description of PZ Cussons as an international consumer goods business founded in 1884.

Microsoft Customer Story-PZ Cussons boosts deployment speed by 60 percent thanks to Casper365 SharePoint management

PZ Cussons

Intranet

Created new Intranet in collaboration with internal Marketing team

Casper365™ Integrated within Teams allows fast, easy access to site requests

Create Fully Customisable Templates for how you do business

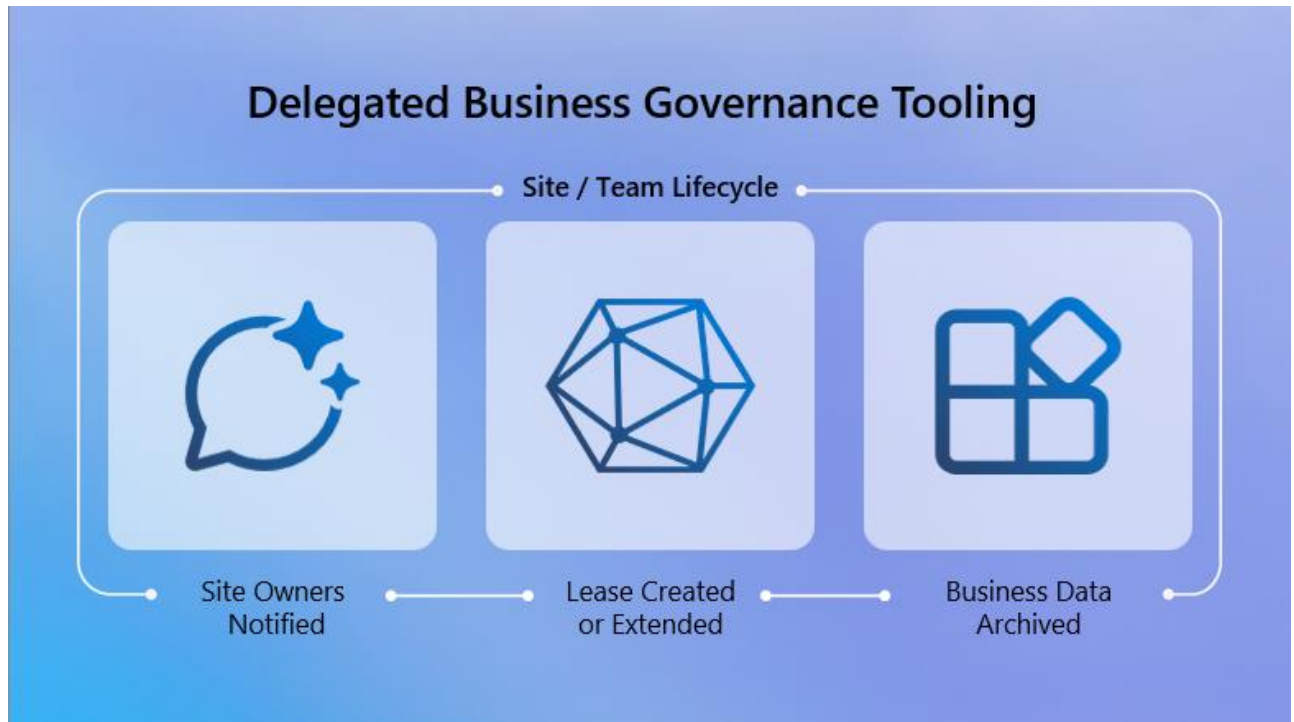

Give Permissions to users to request sites / Teams

Add Approvals step for Governance / IT

Casper365™ Governance Centre

Control Data Retention

Automate your Business Data Governance
Ensure Site Owners Extend, Archive or Delete
Keep your tenant sprawl free

The screenshot displays the Casper365 Governance Centre interface. The top navigation bar includes the Casper365 logo, the user name 'Sharon Sumner', and a 'Business Cloud Integration Ltd' dropdown. The main content area is titled 'Governance Centre / Lifecycle Policy Management' and features a dashboard with six summary cards: All Sites (0), Active Sites (0), Sites Expiring Soon (0), Sites Expired (0), Sites Archived (0), and Sites On Legal Hold (0). Below these cards are tabs for 'My Owned Sites', 'All Sites (Admin)', 'Config Rules (Admin)', and 'Tasks'. The 'All Sites (Admin)' tab is active, showing a table with columns for Site Name, Site URL, Owner(s), Last Ren..., Deadline, Lease Pe..., and State. The table currently displays 'No records available'. A sidebar on the left contains navigation links for Dashboard, Services, Catalogue, User Management, Partners, Offers, Migration Planning Centre, and My Migrations.
