

Know exactly what your Copilot licences are doing

You rolled out Copilot. But who's actually using it and on which surfaces? Which agents are touching sensitive data? **CopilotIQ** connects read-only to your M365 tenant and gives you a complete intelligence dashboard in minutes.

Run your free scan

Why it matters

The challenge

You've invested in Copilot. But is it working?

You rolled out M365 Copilot - and you're paying for every licence. But do you know who's actually using it, which agents are active, and whether the spend is justified?

68% of Copilot licences go underused in the first 6 months. Without visibility, you can't reclaim spend or prove ROI

- No dashboard shows you who last used Copilot and when
- Agents running in your tenant touch data sources you may not know about
- License assignments don't reflect actual usage patterns
- Renewals arrive before you have the evidence to negotiate

The answer

CopilotIQ gives you the answer

Connect once. Get a complete read-only snapshot of every licence, every agent, every data source — so you can maximise every pound spent.

\$34.9k average annual savings potential identified in a typical tenant scan across idle licenses, unassigned seats, & unused agents.

- Per-user activity breakdown updated from live tenant data
- Every Copilot agent mapped with its data sources
- Cost impact of every underused or misassigned licence quantified
- Priority-ranked actions ready to take before next renewal

How it works

One scan. Complete clarity

1

Connect

Authorise read-only access in under 30 seconds via standard OAuth consent. No admin agent to install, no firewall changes — your tenant stays exactly as it is.

2

Scan

CopilotIQ analyses every licence, every Copilot agent, and every usage pattern across your entire tenant — surfacing who's using what, what data is being accessed, and where the waste is.

3

Act

Get a prioritised action list with exact savings, full agent inventory with governance flags, and role-based reports exportable as CSV or PDF before your Microsoft renewal.

Why Business Experts MEA:

- Microsoft Copilot Ready Tier Partner with certified expertise in secure M365 and Copilot Deployments
- Led by Microsoft MVP, ensuring best practice architecture, security and optimization guidance.
- End to end implementation support, from assessment to remediation and roll out with proven enterprise delivery experience in the region.

★★★★ Walk away with

Clear, data-driven insights into Copilot adoption, ROI opportunities, and the actions needed to maximize business value.
