

## **About**

A website builder that allows to create websites fast and easy with a user-friendly interface and true visual designer. Craft captivating websites with no coding skills required!

## **Easy-to-use TRUE visual designer**

An innovative visual designer that pushes the boundaries of traditional website development in Umbraco even further. Build your website by simply dragging and dropping items and see the changes in a real-time without the need to save and preview. No need to code if you have to change something on the page, everything is done visually.

## **Customizable layouts**

The page builder offers remarkable flexibility in configuring layouts, enabling users to craft unique and distinct pages within a single site. Create webpages of any kind by simply adding, deleting, moving, or resizing content blocks to implement even the wildest design ideas.

## **Rich website elements gallery**

Images, sliders, text titles, call-to-action buttons, videos and this is just a part of the gallery. ByteEditor boasts an extensive array of customizable design elements that seamlessly adapt to screens of any size, be it monitors or smartphones. With this diverse selection of elements, users can create pages with various functionalities to suit their needs.

## **Numerous pre-built widgets**

In addition to a rich collection of page elements, ByteEditor also has at its disposal pre-built blocks that are designed to speed up the page creation process. These include a customer review block, a photo gallery, a feature description, and many more. Each one of these blocks has flexible customization options that allow you to create a unique selling landing page within minutes. Create your own widgets from elements and re-use them through your pages, all without coding!

## **Fully extendable**

Found some useful widget or service like a chatbot or a booking form that you would like to have on your website? You can add any widget or part of the code within minutes by utilizing the embedded element. No extensive documentation or lengthy tutorials are necessary for that.

## **With SEO in mind**

The page builder has all the essential tools required for effectively promoting your content on search engines, including the creation of sitemaps, configuring meta tags, establishing robots.txt, and adding image alt text.

## **Powered with blog engine**

ByteEditor is equipped with an extensive blogging engine, enabling effortless management of numerous blog posts, multi-user functionality, and customizable author roles. Moreover, it offers a diverse range of options for crafting blog content, including images, videos, quotes, fonts, convenient SEO settings for rapid indexing, and various other features aimed at enhancing the uniqueness and informativeness of your posts.

## **Perfect for landing pages and one-pagers**

The site builder was created with the expectation that it will be used by many businesses and therefore it has many pre-built blocks that significantly speed up the process of creating landing pages. Such blocks include a feature block, a pricing block, customer reviews, and others. If you need a website dedicated to the event, an influencer, or just a landing page for some promo activity, then ByteEditor is your choice.

## **Good choice for complex solutions**

Use ByteEditor as your Starter pack for more complex websites and focus on backend and important website business logic and not on tedious layout and front-end work. Give content managers delight in having an easy-to-use and powerful landing page builder.

## **Why ByteEditor**

ByteEditor is developed with love by ByteAnt, a Ukrainian web development agency with 10+ years of experience developing Umbraco websites. Our experienced team has been working with Umbraco since its 7th version, and we've encountered numerous client frustrations regarding the absence of a visual designer for new page creation. Recognizing this unmet need in the market, we embarked on a mission to address it by developing ByteEditor—an innovative site builder for Umbraco equipped with a powerful visual designer previously unavailable on the market.

## **Developed and supported by an experienced team**

Our team of experienced developers not only developed ByteEditor, but also constantly supports it, actively answers user questions, and collects feedback on the implementation of

new features. By choosing ByteEditor you are also choosing stable support from an experienced development team.

## **We know your pains and struggles**

Using our rich experience in creating websites on Umbraco and deep understanding of client's needs, we have implemented many important solutions in ByteEditor that greatly facilitate the process of creating websites. We actively interact with our user community and are always ready to help.

## **Ready to try?**

ByteEditor has a free trial that you can use without any limits or obligations. You can start using our site builder right away without a complex installation process, just click a few buttons and start tinkering!

If you decide to buy a subscription, then you do not need to worry about manually renewing your subscription, everything is automated. One license includes several domains.

## **Umbraco Awards**

### Why EasyByteEditor

EasyByteEditor was developed to simplify website development for newcomers while providing a tool for experienced web developers to expedite the development process.

This is the easiest website builder for Umbraco, which allows beginners to create beautiful and functional websites on their own in the shortest possible time without involving development teams, which saves development budgets and allows small business owners to be more likely to choose Umbraco over other systems.

EasyByteEditor also allows users to expand its basic functionality and integrate other services into the website such as social buttons, Instagram photo galleries, video players, and much more.
